Panasonic

NEW

Amplifier Built-in / U-shaped Micro Photoelectric Sensor

Ultimate U-shaped micro photoelectric sensors One Step Ahead in Performance and Mounting Ease

2015.12 panasonic.net/id/pidsx/global

Industry's First* and Industry's Top-in-Class* Advanced Sensors in the Industry.

Three protection circuits standard on all models

All models are standardly equipped with the following protection circuits in their compact bodies. These protection circuits minimize the possibility of sensor malfunctions caused by erroneous wiring.

Reverse supply polarity protection circuit

Reverse output polarity protection circuit

3 Output short-circuit protection circuit

Industry's first! IP64 rating

25 SERIES PM-45 SERIES

Our original integrated molding method has eliminated grooves and gaps on the sensing surface and main body, thus reducing the possibility of malfunctions caused by splashing water or dust.

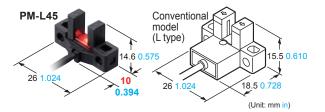

Large and easy to see Multi-angle operation indicator PM-25 SERIES PM-45 SERIES PM-65 SERIES

The large operation indicator (orange) lights up when the beam enters. The indicator is easy to see from above and from the sides.

Compact size

All new models require significantly less mounting space than our conventional models when mounted with the same pitch. What's more, the new models can directly replace our conventional models currently in use.

[Look!] All models easy to mount with M3 screws PM-25 SERIES PM-45 SERIES PM-65 SERIES

The sensor unit can be installed with one or two M3 screws. * M3 screws and washers are not included.

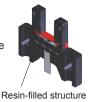

- M3 screws and washers are not included.
- Models requiring one M3 screw for installation PM-F25, PM-R25, PM-F65, PM-R65

6 mm 0.236 in

 Models requiring two M3 screws for installation Models other than above

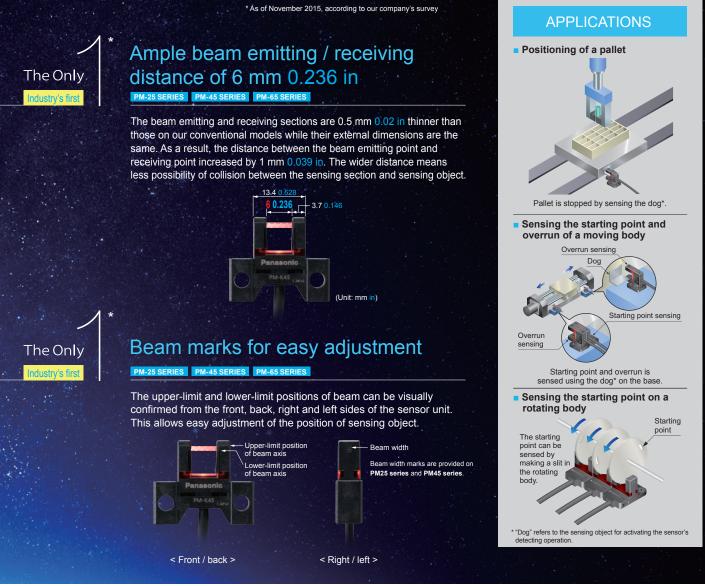

Resistant to vibrations and impacts PM-25 SERIES PM-45 SERIES PM-65 SERIES

The sections where stress concentrates, such as the connecting section of the cable and internal circuit, are covered with a resin. This helps prevent malfunctions caused by vibrations and impacts.

Resin-filled structure (cross-sectional view)

Weig	ght		Net weight: 10 g app	rox., Gross weight: 15 g a	pprox.	Net weight: 30 g approx., Gross weight: 35 g approx.		

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F. 2) The response frequency is the value when the disc, given in the figure below, is rotated.

3) In case the PM-25 series is used at an ambient temperature of +50 °C +122 °F, or more, make sure to mount it on a metal body.

- 4) Note that the cable of PM-□25-R loses its flexibility when the ambient temperature decreases to about -10 °C +14 F°.
- 5) The cable of PM-D25-R is a bending-resistant cable usable on a moving base. When the sensor is mounted on a moving base, secure the sensor cable joint at the unit in place so that stress is not applied to it.
- 6) When storing PM-D25-R, make sure that the cable does not come into contact with the sensing section or operation indicator.

7) If the cable is extended to 20 m 65.617 ft or longer, confirm that the supply voltage at the end of the cable attached to the sensor is 4.5 V or higher.

Sensing position

PRECAUTIONS FOR PROPER USE

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

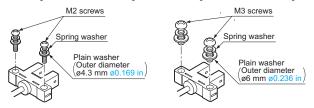

Mounting

PM-25 series

• The following conditions must be observed when using screws to mount the sensor unit.

Screw	Spring washer	Flat washer	Tightening torque
M2 screw	1 pc.	ø4.3 mm ø0.169 in (small round washer)	0.15 N·m
M3 screw	1 pc.	ø6 mm ø0.236 in (small round washer)	0.5 N·m

< When using M2 screws for mounting > < When using M3 screws for mounting >

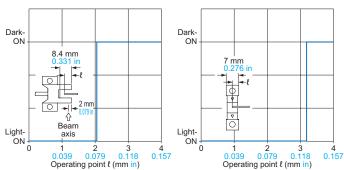

When using the optional mounting screw set **MS-M2**, a spring washer is included.

 In case the PM-25 series is used at an ambient temperature of +50 °C +122 °F, or more, make sure to mount it on a metal body.

PM-45 series

M3 screws Spring washer (Outer diameter (e6 mm @0.236 in)			ter \

PRECAUTIONS FOR PROPER USE

Cable extension

PM-25 series / PM-45 series

 Cable extension is possible up to an overall length of 100 m 328.084 ft with a 0.3 mm², or more, cable.
 However, since a voltage drop shall occur due to the cable extension, ensure that the power supply voltage at the end of the cable attached to the sensor is within the rating.

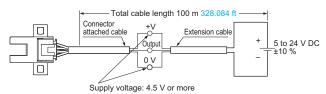

But, when the overall cable length, including the cable attached to the sensor, is as given below, there is no need to confirm the voltage.

Conductor crosssection area of extension cable	Total cable length
0.08 to 0.1 mm ²	Up to 5 m 16.404 ft
0.2 mm ²	Up to 10 m 32.808 ft
0.3 mm ²	Up to 20 m 65.617 ft

PM-65 series

• Cable extension is possible up to an overall length of 100 m 328.084 ft with a 0.3 mm², or more, cable. However, since a voltage drop shall occur due to the cable extension, ensure that the power supply voltage at the end of the connector attached cable of the sensor or at the sensor terminals is within the rating.

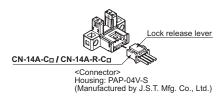

But, when the overall cable length, including the cable attached to the sensor, is as given below, there is no need to confirm the voltage.

Conductor crosssection area of extension cable	Total cable length
0.08 to 0.1 mm ²	Up to 5 m 16.404 ft
0.2 mm ²	Up to 10 m 32.808 ft
0.3 mm ²	Up to 20 m 65.617 ft

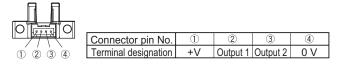

Wiring (PM-65 series)

Connection method

 Insert the connector attached cable CN-14A-C□ / CN-14A-R-C□ in the connector part of this product as shown in the figure below.

<Connector pin position>

Disconnection method

- Press and hold the lock release lever to disconnect the cable connector.
- Note: Pulling the cable without pressing the lock release lever in an attempt to disconnect the connector can cause wire breakage in the cable or damage to the connector.

When using the product as an S-mark compatible product in Korea

• The power supply cable and output cable connected to the product must be less than 10 m 32.808 ft.

Other

- This device has been developed / produced for industrial use only.
- Since the sensor is intended for use inside machines, no special countermeasures have been taken against extraneous light. Take care that extraneous light is not directly incident on the beam receiving section.

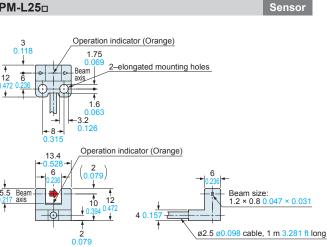

- Do not use during the initial transient time (50 ms) after the power supply is switched on.
- Note that the cable of PM-D25-R loses its flexibility when the ambient temperature decreases to about -10 °C +14 °F.
- The cable of **PM**-**25-R** is a bending-resistant cable usable on a moving base. When the sensor is mounted on a moving base, secure the sensor cable joint at the unit in place so that stress is not applied to it.
- When storing PM-□25-R, make sure that the cable does not come into contact with the sensing section or operation indicator.
- If the sensor is used in a place having excessive dust, periodically clean the emitting and receiving sections with a dry, soft cloth.
- If there is a large surge generating equipment, such as, motor, solenoid, electromagnetic valve, etc., in the vicinity of the sensor, use a surge absorber on that equipment. Further, do not run the sensor cables along power lines and use a capacitor between +V and 0 V, if required. Use the sensor after confirming that the surge has been eliminated.
