Features:

- Non-inductive design
- Molded body for package uniformity
- Ideal for pulse-load handling characteristics
- RoHS compliant / lead-free

Carbon Composition Resistor

Technical Guide:

1. Storage Conditions:

Temperature: 5 to 35°C (40 to 95°F) Humidity: 25 – 60% relative humidity

Term: One year in poly-bag with desiccant. If parts are removed from the poly-bag,

they should be used immediately or resealed in the bag.

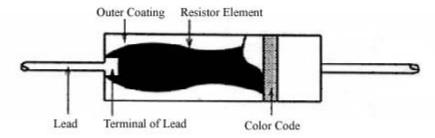

Environment: Clean, dry environment, free of corrosive gases

2. Application precautions:

Lead forming: Forming is recommended at least 2mm of farther from the base of the lead Soldering: Soldering is recommended at least 4mm or farther from the base of the lead

3. Washing:

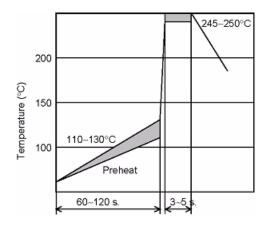

Carbon composition resistors are highly hygroscopic and changes in resistance value can occur if too much moisture is absorbed. For this reason it is recommended not to use water or water-soluble solvents to clean these components. Alcohol or hydrocarbon solvents are recommended for rinsing.

4. Soldering Recommendations:

Note: The conditions shown below are for reference. Please perform a mounting evaluation to assure compatibility.

a. Flow soldering (recommended profile for Sn and Sn/Pb solders)

b. Soldering iron (recommended for Sn and Sn/Pb solders)

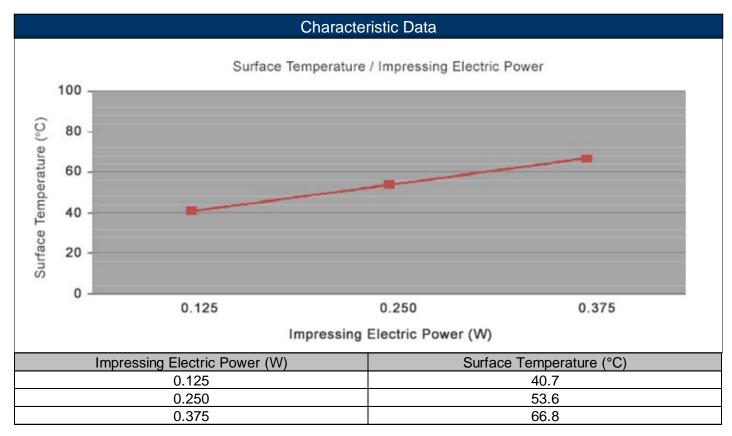

Temperature of soldering tip: 300°C, duration: 10 sec. max. Temperature of soldering tip: 350°C, duration: 3 sec. max.

Other:

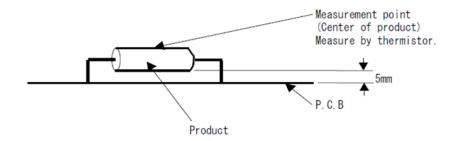

- Evaluate and confirm the compatibility of your assembly process with this product.
- 2. Refer to the catalog, the product news, and the specifications for details on the RC series resistors.
- 3. If you have any questions, please contact our sales staff.

RoHS Compliance

Stackpole Electronics has joined the worldwide effort to reduce the amount of lead in electronic components and to meet the various regulatory requirements now prevalent, such as the European Union's directive regarding "Restrictions on Hazardous Substances" (RoHS 2). As part of this ongoing program, we periodically update this document with the status regarding the availability of our compliant components. All our standard part numbers are compliant to EU Directive 2011/65/EU of the European Parliament.

"Conflict Metals" Commitment

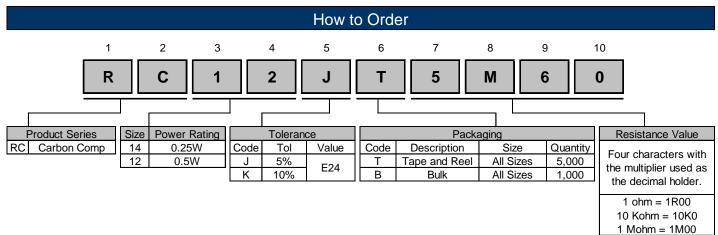

We at Stackpole electronics, Inc. are joined with our industry in opposing the use of metals mined in the "conflict region" of the Easter Democratic Republic of the Congo (DRC) in our products. Recognizing that the supply chain for metals used in the electronics industry is very complex, we work closely with our own suppliers to verify to the extent possible that the materials and products we supply do not contain metals sourced from this conflict region. As such, we are in compliance with the requirements of Dodd-Frank Act regarding Conflict Minerals.

Compliance to "REACH"

We certify that all passive components supplied by Stackpole Electronics, Inc. are SVHC (Substances of Very High Concern) free and compliant with the requirements of EU Directive 1907/2006/EC, "The Registration, Evaluation, Authorization and Restriction of Chemicals", otherwise referred to as REACH. Contact us for complete list of REACH Substance Candidate List.

Environmental Policy

It is the policy of Stackpole Electronics, Inc. (SEI) to protect the environment in all localities in which we operate. We continually strive to improve our effect on the environment. We observe all applicable laws and regulations regarding the protection of our environment and all requests related to the environment to which we have agreed. We are committed to the prevention of all forms of pollution.
