SERIES 08,09,42,44,50

## Spring Return

## FEATURES

- Hold-To-Test, Hold-To-Calibrate,

And Other Momentary Applications

- Choice of Configurations, Ratings, Styles and Circuitry
- 10,000 Cycles of Operation

## DESCRIPTION

A spring return rotary switch has 1 or more momentary positions. Maintaining contact at momentary positions requires rotational force. Releasing the force allows the mechanism to return the contact to a normal, or detent, position.

## DIMENSIONS

## Series 08 \& 09

| No. of <br> Decks | Dim <br> $\mathbf{A}$ | Dim <br> $\mathbf{B}$ |
| :---: | :---: | :---: |
| 1 | $.960(24,38)$ | $.062(1,57)$ |
| 2 | $1.228(31,19)$ | $.062(1,57)$ |
| 3 | $1.496(38,0)$ | $.062(1,57)$ |
| 4 | $1.764(44,81)$ | $.062(1,57)$ |
| 5 | $2.032(51,61)$ | $.062(1,57)$ |
| 6 | $2.550(64,77)$ | $.312(7,92)$ |

For all other dimensions and specifications, see Standard Switch pages.

## CONFIGURATIONS

This configuration indicates a counterclockwise force is required to hold the switch at position \#1. " M " indicates a momentary position counterclockwise of "D" and "D", detented ones.

Positions

$$
\begin{array}{ccc}
1 & 2 & 3 \\
M & D & D
\end{array}
$$

Releasing this force breaks contact with position \#1 and returns the switch to \#2. Normal rotary switch detent action occurs when the switch is rotated between position \#2 and \#3.
All of the configurations (except MDM) list a basic 2 position arrangement which is shown in italics. Example: MDDDDD or DDDDDM. Several positions can be added during the switch construction at the factory; but, any configuration must always contain the 2 basic positions.

Series 50
Equivalent to Series 50 Standard Switches

Series 42 \& 44

For all other dimensions and specifications, see Standard Switch pages

## SELECTING A SWITCH

1. Select a Configuration: The total number of positions always includes the 2 basic positions. A (4) position switch of DDDDM configuration would have 3 detent positions counterclockwise of the momentary position.
2. Select Series, Angle of Throw, and Style: See the Choices Chart. The basic switch description, series, and throw are as follows:
$1 / 2^{\prime \prime}, 1 / 4$ Amp, multi-deck $08=36^{\circ} 09=30^{\circ}$ 1", 1 Amp, multi-deck $\quad 42=36^{\circ} \quad 44=30^{\circ}$ $1 / 2^{\prime \prime}, 200 \mathrm{~mA}$, single deck $50=36^{\circ}$
Electrical ratings are the same as those of the conventional switches with the exception of life. Life is limited to 10,000 cycles of operation ( 25,000 cycles for Series 50 ) due to the spring arrangement. Dimensions are the same as for conventional types except for the shaft flat orientation of the $3,4,5$, and 6 pole, Series 09 and 44 in the DDDDDM configuration (see chart).
3. Select Poles \& Positions Per Pole: If you do not find the poles and positions per pole you need in one series, try another or contact the factory. If the behind panel length is a problem, select a multi-pole type instead of a single deck.

## OPTIONS

Watertight panel seal; Multi-pole switches that exceed the limits noted in the Selector Chart; Series 50 MD or DM configurations in Military styles; Series 08, 09, \& 44 in MMMDMMM, and in MMDDMM, and in MMMMMD.

Special Function Rotary Switches

SERIES 09, 42, 44, 50, 51

## Isolated Position

## FEATURES

- Protected Switch Positions For Safety, Calibration, or Stand-by
- Choice of Push- or Pull-To-Turn
-1⁄2" Diameter, 200 mA and
1" Diameter, 1 Amp Switch
-10,000 Cycles of Operation

## DESCRIPTION

An isolated position is one which cannot be reached by the normal rotation. An additional action is required by the operator. It could be either Push-To-Turn, or Pull-To-Turn. After the switch is rotated to the isolated position, releasing the shaft locks the switch in that position. Push or pull again to rotate the switch again.
Use isolated positions to protect a switch position from indiscriminate rotation. Such safety positions might include "calibrate", "off" and/or "stand-by".

## DIMENSIONS

## EXTERNAL DIFFERENCES

The isolated position mechanism increases the depth of the Series 50 and 51 by $0.217^{\prime \prime}(5,51$ mm ). All other dimensions remain unchanged In Series 9, 42 and 44, it has the appearance of an additional deck section without terminals, located directly behind the detent system.

## SPECIFICATIONS

## Electrical Ratings

The switching elements, and therefore ratings, are the same in an isolated position switch as in a conventional rotary switch. Mechanical life is also the same.

## Additional Characteristics

Shaft Movement or Vertical Travel:

| Series 09 | $.062 \pm .020(1,57 \pm 0,51)$ |
| :--- | :--- |
| Series $42 \& 44$ | $.070 \pm .020(1,78 \pm 0,51)$ |
| Series $50 \& 51$ | $.080 \pm .020(2,03 \pm 0,51)$ |

Push or Pull Force Required:

| Series 09 | $1.75 \pm .5 \mathrm{lbs}$ |
| :--- | ---: |
| Series 42 \& 44 | $2 \pm .5 \mathrm{lbs}$ |
| Series $50 \& 51$ | $2 \pm .5 \mathrm{lbs}$ |

Series 50 \& 51
$2 \pm .5 \mathrm{lbs}$
Stops: Single pole per deck switches with the maximum number of positions are supplied with stops only on request: 12 positions in $30^{\circ}$ throw, 10 in $36^{\circ}$, and 8 in $45^{\circ}$.
Stop Strength: Approximately 7.5 pound-inches for the isolated position stop.

## Materials and Finishes

Materials and finishes for the isolation mechanism are listed here.

## Series 50 and 51

Housing: Zinc casting, tin/zinc-plated
Shaft: 303 stainless steel
Stop Pin and Stop Post: 303 stainless steel
Spring: Tinned music wire
Series 09
Housing: Phenolic for style A; Diallyl, for M Shaft: 303 stainless steel, electro-polished
Stop Pin and Stop Post: 303 stainless steel
Spring: Tinned music wire
Series 42 and 44
Housing: Diallyl per MIL-M-14
Shaft: 303 stainless steel
Lock Plate: 302 stainless steel
Lock Arm: 316 stainless steel
Lock Post: Brass, tin/zinc-plated
Compression Spring: Tinned music wire

*(Pull-to-Turn only) **For specifics on military qualified products, see Standard Switch Pages.

## CONVENTIONAL NUMBERS

Start by creating a conventional switch number in the manner which follows:

Note: No stop arrangement suffix is needed. See Describing Stops.

## DESCRIBING POSITIONS

The Grayhill system for isolating positions lets you choose the positions to be isolated. Grayhill inserts isolation posts next to the positions to be isolated. Consider a continuous rotation switch of the Series 09A with a $30^{\circ}$ angle of throw. The terminals are listed here from 1 through 12 with a space between each to indicate where isolation posts might be inserted.

$$
12123456789101112
$$

Let's isolate position 1 and position 2 from all other positions and from each other. We indicate isolation posts as shown here: 12P1P2P3 456789101112 To isolate just position 1 , describe like this: 12P1P2 3456789101112 To isolate positions 1 and 2 from all other positions, but not from each other, do this: 12P1 2P3 456789101112

## DESCRIBING STOPS

When a 1-pole switch has less than the maximum number of positions, consider also the stop system. Following is the arrangement for a 6 position switch with the position 1 isolated.

STOP 1P2 3456 STOP
The word "STOP" indicates the conventional switch stops, which limit rotation to positions 1 through 6 . To isolate position 1 we insert only one isolation post-between terminals 1 and 2 . The stop system already prevents rotation beyond terminal 1.
In multi-pole switches, the stop system and isolation system described for the first pole, automatically affects the other poles. In the example above, isolating position \#1 on the first pole isolates the first position (terminal \#7) of the second pole. See Standard Switch Pages for a 2 pole circuit diagram for a $30^{\circ}$ throw switch.

## ORDERING INFORMATION

Indicate this as a SPECIAL switch to ensure that no error is made when the order is entered. Sample part number:

## SPECIAL <br> 09A30-04-1-12N <br> PULL 12P1P2P3 456789101112

This sample part number orders a Series 9 standard style, four deck, one pole per deck, twelve positions per pole rotary switch with nonshorting contacts and isolation posts between positions 12 and 1, between 1 and 2, and between 2 and 3 .

This lengthy order number is required to prevent any possible confusion in ordering the switch. When we receive your order, we will assign a special "short form" part number to facilitate future identification of this special switch. This number is sequentially assigned as the need arises, and is non-descriptive. A typical "short form" special part number might be 09YY12345. Contact Grayhill for price.

Not available through Distributors.
