# Manual Switches

# Series 4

# Pushbutton Switches and Indicators

Bezel on all sides

Barriers on short sides

Barriers on long sides

#### FEATURES

- Provides distinctive color display whether lighted or unlighted.
- Convenient front panel mounting and relamping, without tools.
- Matching indicators.
- Locked button option discourages tampering.
- Choice of transmitted color, projected color, or dead front display.
- UL recognized, CSA certified.

Barrier on one short side

#### MOUNTING

Snap-in mounting. Switch or indicator is easily inserted into the cutout. Mounting clips grip the panel. No tools are needed.

Housings with a full bezel can be front panel or sub-panel mounted, individually or in strips.

Barrier type housings are normally mounted top-of-panel in strips, but can also be individually mounted. Barriers can be on either the short or long housing sides.

The drawing shows how housings with a barrier on one side are used in a strip of two or more units. The first has a barrier on two sides, while all other units have a barrier on one side, and butt against each other.

#### ELECTRICAL RATINGS

- 5-amp silver contacts 5 amps res., 3 amps ind., 30 VDC. UL code L-4: 5 amps, 250 VAC
- 10-amp silver contacts UL code L-285; 10 amps, ½ Hp, 125 or 250 VAC.

Gold contacts — 1 amp res., 0.5 amp, ind., 30 VDC UL code L-22: 1 amp, 125 VAC

Gold alloy contacts — 0.1 amp, res., 30 VDC; 1 amp, 125 VAC.

#### LOCKED BUTTON OPTION

Series 4 can be furnished with a locked button option for use in areas accessible to the public, where tampering and vandalism are problems. The housing has a special mounting clip with built-in button retainer. This mounting clip must be removed from behind panel to allow button removal. Button movement during switch operation is unaffected by locked button feature. (These units cannot be relamped from front of panel.)

1. Lamps and legends can be changed from panel front. When button is removed, lamp is extracted from its socket and retained in button.

2. Ease of lamp replacement. After the inoperative lamp is automatically removed with the button, the new lamp is inserted without the use of tools.

#### 11 Incandescent Illumination 11 No lamp, has lamp socket for T-31/4 wedge base lamps. 21 #161 12-volt T-31/4 lamp. 31 #656 or 152 28-volt T-31/4 lamp 91 Unlighted, no lamp socket.

Black switch housing with a bezel on all

sides, mounting clips on long sides, 1-

pole momentary-action 5-amp silver con-

tacts, 110" quick-connect/solder termi-

nals, and a T-31/4 lamp socket.

Example: 4A11BAA11

#### MOUNTING CLIP ORIENTATION

Mounting clips on the **long sides** of the housing are specified when individually mounted or when the long sides of strip mounting housings parallel the long sides of the panel cutout slot. The most secure mounting is achieved when the mounting clips are on the long sides.

Mounting clips on the **short sides** of the housing are specified when short sides of strip mounted housings parallel the long sides of the panel cutout slot.

Series 4

# Series 4

Pushbutton Switches and Indicators

shell provided.

\*To be ordered with switch.

Button and metal shell

Button

Example: 4B1AGN

Green (transmitted color) unlegended button. (If the button shell is also desired, substitute 4B2 for 4B1.)

Note: legended button should be assembled as shown above, with button notch keyed to lamp removal slot in shell. This will reduce possibility of lamp droppage when button is removed from the housing. Buttons are legended in this manner.

#### LEGENDING

#### Pad printed legends

Use Legend Order Sheet FO-63039 (see page 110) to specify pad printed legends. Reproduce it on your office copier. Legends are oversprayed for maximum durability.

Manuals

#### Film legends

Film legends are not supplied by MICRO SWITCH. However, this service is readily available from commercial sources or may be provided through your in-house capabilities. The film should be polyester to withstand lamp heat and must be precision cut, per the dimensions shown on the next page, to insure proper alignment.

The film fits into a small undercut on the face of the button insert. The film is held securely when the outer button and insert are snapped together. (Note: It is difficult to disassemble for legend changes without damaging the parts.)

Button and insert should be snapped together prior to being assembled to the button shell.
