

TTG-KT88PP UL Push-Pull Output Transformer

Toroidal Push-Pull output transformer for tubes 2xKT88 , 2x300B, 2x6550 introduces benefits of toroidal cores to tube output. Through the use of innovative, internationally patented winding technology, we have achieved exceptional electrical parameters, such as flat frequency bandwidth in acoustic range, very low THD distortion and high quality factor.

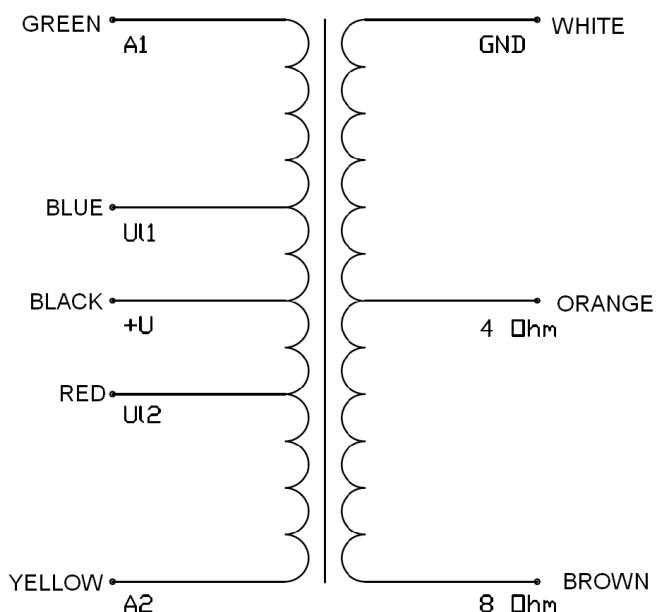

Transformer is also available in stainless steel box potted EXPO version.
