For Digi One, PortServer TS, PortServer II, and Multi-Port Adapters with RJ-45 connectors.

Cable Adapters

Cabling your serial devices to a Digi product is now easier than ever with our new cable adapters. While many custom cabling solutions can leave you with a cable that is either too long or too short for your application, the Digi cable adapters are used with commercially available CAT 5 cable of any length. Simply plug standard CAT 5 cable into your Digi product, connect a cable adapter to the other end and plug the adapter into your device. For more information see Cable Adapter Cross Reference document.
