

THE PULSE OF AUTOMATION

THREE NEW ULTRASONIC MODELS: F77, 30GM70, 30GM-IO

The pulse of automation

The latest generation of ultrasonic sensors from Pepperl+Fuchs provides advantages such as an optimized dead band and simple, intuitive installation.

Three new sensor families cover the complete application spectrum.

The compact F77 sensors provide best-in-class immunity to acoustic interference and are designed for space-restrictive installations.

UC...30GM70 sensors feature a detachable infrared interface for easy software configuration.

The UC...30GM...IO sensors are easily configured via pushbutton or IO-Link, and solve a wide range of applications.

Backed by decades of experience and technical leadership, Pepperl+Fuchs leads the industry in innovation, reliability, and product diversity.

30GM70 – The right sensor version for every application

The new 30GM70 ultrasonic sensors analyze the echoes received in real time, free of any interruption. As a result, these sensors can be configured and fine tuned for use in particularly challenging applications.

MAIN FEATURES

- Many different housings and sensing ranges
- Always the right sensor, can be used immediately without parameterizing
- Sensors with multiple output options
- Adjustable with or without target presence
- Optimum adaptation to your application without interrupting processes
- Simple alignment

Model number	Sensing range	Dimensions	Switching output	Analog output	Interface	Setting
UC500-30GM70	500 mm	ø 30 mm x 100/110/130 mm	2NO/NC	■	Infrared	UltraProg-IR
UC2000-30GM70	2000 mm					
UC3500-30GM70	3500 mm					
UC6000-30GM70	6000 mm					

Sensing parameters are adjustable on the fly, without interrupting the control outputs

YOUR APPLICATION. OUR CHALLENGE.

PROCESS INTERFACES

- Intrinsically safe barriers
- Signal conditioners
- Fieldbus infrastructure
- Remote I/O systems
- HART interface solutions
- Level measurement
- Purge and pressurization systems
- Industrial monitors and HMI solutions
- Explosion protection equipment
- Wireless solutions
- Solutions for process interfaces

INDUSTRIAL SENSORS

- Proximity sensors
- Photoelectric sensors
- Industrial vision
- Ultrasonic sensors
- Rotary encoders
- Positioning systems
- Inclination and acceleration sensors
- AS-Interface
- Identification systems
- Logic control units
