

## VF4A (Standard, Shrouded and Weatherproof)

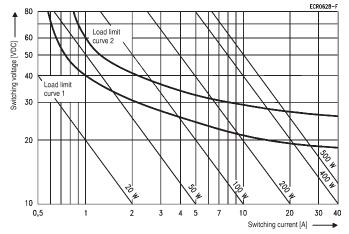

- Pin assignment similar to ISO 7588 part 1
- **■** Plug-in terminals
- Customized versions on request
  - Integrated components (e.g. resistor, diode)
  - Customized marking
  - Special covers (e.g. brackets, shrouded)

### Typical applications

Cross carline up to 40A for example: ABS control, blower fans, car alarm, cooling fan, Electric Power Steering, energy management, engine control, fuel pump, heated front screen, lamps: front, rear, fog light, main switch/supply relay, valves, wiper control.

#### Max. DC load breaking capacity

Load limit curve 1: arc extinguishes during transit time (changeover contact).

Load limit curve 2: safe shutdown, no stationary arc (make contact).

Load limit curves measured with low inductive resistors verified for 1000 switching events.

| Contact Data (continued) |   |
|--------------------------|---|
| Mechanical endurance     | >1x10 <sup>6</sup> ops.                     |
|                          | ve load with suitable spark suppression and |

- at maximum 14VDC for 12VDC or 28VDC for 24VDC load voltages. For a load current duration of maximum 3s for a make/break ratio of 1:10.
- Current and time are compatible with circuit protection by a typical automotive fuse. Relay will make, carry and break the specified current.
- See chapter Diagnostics of Relays in our Application Notes or consult the internet at http://relays.te.com/appnotes/
- 4) For unsuppressed relay coil. A low resistive suppression device in parallel to the relay coil increases the release time and reduces the lifetime caused by increased erosion and/or higher risk of contact tack welding.
