### **LED Indicators**

2 provided are clearly visible up to a 45 degree offset from vertical with office environment ambient lighting. The status is reflected in the indicator color.

The DC\_OK LED is bicolor. It shall light green if the DC output is within specification, and amber if the output falls out of specification.

**The AC\_OK** LED is Green if the AC is within specification and off when out of specification. Note: With 5 V standby, Amber also indicates that PSU is in standby mode/output off.

## **Control Signals**

**AC\_OK** Open collector 0.5 V maximum at 10 mA. Both emitter and collector access provided.

**DC\_OK** Open collector 0.5 V maximum at 10 mA. Both emitter and collector access provided.

DC\_OK will de-assert when output is loss due to OCP, OVP, OTP, or Fan Fault (for -N option).
