## The Company

*Amphenol Canada Corp.* a subsidiary of Amphenol Corporation, is an international leader in the manufacture of *Filtered Connectors* and *Specialty Interconnect Devices*, and has been pioneering EMI and EMP technologies for more than 40 years.

Located in Toronto, Canada, our ISO 9001 certified facility employs approximately 400 people. Our activities are dedicated to the design, development and manufacture of EMI/EMP filter

connector products which are used in Commercial, Industrial, Communications, Military and Aerospace applications worldwide. Our expertise in understanding and supporting our customers' filter interconnect needs has earned Amphenol Canada a reputation of quality and excellence among the world's leading users of electronic components.

## What is a Filtered Connector?

A **filtered connector** is the combination of filter elements in a connector, forming one neat, compact interconnect device that can filter unwanted EMI. The most popular configuration is when

capacitors are mounted inside the connector between each of the contacts and the connector ground shell.

## Benefits

**Better EMI Control** – With minimized lead inductances and short, direct paths to ground of the filter, performance will typically out perform the same filter components on a P.C.B. by a factor of three to one.

**PCB Space Savings** – Incorporating filter elements into the connector, enables simplification of the required filter schematic for the necessary performance plus a savings of 2-4 square inches.

**Cost Savings** – Filter elements, such as inductors and capacitors, must no longer be purchased, stocked, assembled or tested. Fewer components means greater reliability at lower cost.

**Easy EMI/RFI Upgrade** – These compact filtered connectors fit standard non-filtered connector footprints. For improved EMC performance, simply replace the existing connector with a filtered connector.

**EMC Compliance & Immunity** – EMI that is generated from the electronic device, radiated or conducted, will be re-directed to chassis ground through the connector shell. This same device will also protect the system from external EMI/RFI noise (such as radio transmitters, ESD, or natural phenomena such as lightning) in the same way.

## Choosing the Right Capacitance for Your Filter Connector

- (1) Determine the highest frequency that the filter connector needs to pass unaffected.
- (2) Which frequencies are causing trouble, either with emissions or with immunity to interference?

- (3) Scan the Insertion Loss charts on page 2 to select a filter which provides little or no insertion loss (filtering) at the frequency determined from step 1, yet gives the greatest possible insertion loss at the frequencies determined in step 2.

Nominal Insertion Loss values described in this catalog are based on the Mil-STD-220 test method - a 50 ohm balanced load and source impedance. Different systems will differ from this and

hence, the filter connector may perform differently. The final decision will be determined from actual EMI/RFI testing of the equipment in question.

## CAPACITIVELY DECOUPLED RF CONNECTORS

### Specifications

**Mechanical Data:**

- Shell:** Zinc Diecast or Brass; Nickel plated
- Insulator Body:** Thermoplastic
- Contact Insulator:** Nylon or Teflon
- Center Contact:** Phosphor Bronze or Beryllium Copper; Gold plated (456-107S is silver plated)
- UL File # :** E135615
- CSA File # :** LR68598

**Filter Performance:**

Capacitance	10,000 pF	
Working Voltage	200 VDC (500AC Rear Mt)	
DWV	600 VDC (1000VDC for Rear Mt)	
Filter Insertion Loss (dB) (per MIL-STD-220 @ 25°C and no load)	1 MHz	4
	5 MHz	16
	10 MHz	18
	30 MHz	25
	50 MHz	30
	1000 MHz	30

\* OTHER CAPACITANCE VALUES ARE AVAILABLE. CONSULT THE FACTORY FOR DETAILS.

These products are protected by U.S. Patent # 4,772,221.

Amphenol's 456 Series of RF connectors provides capacitive decoupling between the connector body and the mounting panel. EMI on the coaxial shield is shunted to the chassis ground through capacitors, while not affecting the DC and power supply frequencies. This reduces ground loop problems and provides a mechanism to harmlessly dissipate ESD to chassis ground.

The RF parameters of these connectors are the same as their non-filtered counterparts. Filtering does not affect the signal contact, but only the shell-to-ground connection. Capacitively decoupled RF connectors are interchangeable and inter-changeable with standard non-filtered versions.

Filtered	456-117	456-717
Filtered (10,000pF), 1000V Spark Gap	456-117S	456-717S
Filtered (10,000pF), 1000V Spark Gap, 1 M Ω Resistor	456-117F	456-717F
Grounded	456-117G	456-717G
Non-Filtered. Panel Insulated (no ground spring)	456-117NF	456-717NF

### Rear Mount BNC, Crimp, Cable Size RG179

Type	50 Ω	75 Ω
Filtered	456-208	456-218
Grounded	456-208G	456-218G

Note: Also available with Spark gap and / or resistor  
\* Other Cable Sizes Available. Consult Factory.

### Vertical Mount BNC, Press-Fit

Type	50 Ω	75 Ω	Board Thickness	"A"
Filtered	--	456-107A	.125 (3.18)	.170 (4.32)
Non-Filtered	--	456-107ANF	.125 (3.18)	.170 (4.32)
Filtered	--	456-107B	.200 (5.08)	.255 (6.48)
Non-Filtered	--	456-107BNF	.200 (5.08)	.255 (6.48)

-- Consult Factory for Part Number

# 456 Series

## CAPACITIVELY DECOUPLED RF CONNECTORS

### Front Mount BNC, Right Angle PCB

Type	50 Ω	75 Ω
Filtered	--	456-107

-- Consult factory for part number

Front Mount BNC packaging consists of connector, insulating washer, filter ring, lock washer and hex nut.

### Front Mount BNC, Solder-Cup

Type	50 Ω	75 Ω
Filtered	456-107SG	456-107TG

456-107S has silver plated contact (50 Ω).

\* Overall part length  
 1.180 (29.97) for 456-107S  
 1.245 (31.62) for 456-107SG & 456-107TG.

Front Mount BNC packaging consists of connector, insulating washer, filter ring, ground washer and hex nut.

### Jack-to-Jack Adapter

	Type	50 Ω	75 Ω
BNC:	Filtered	456-915	456-917
Twin BNC:	Filtered	456-920	

### TNC Bulkhead Jack, Crimp (RG58/U Cable)

Type	50 Ω	75 Ω
Filtered	456-102	--

-- Consult factory for part number

Packaging consists of connector, mounting hardware, panel insulator, crimp ferrule and heat shrink tubing.
