Connectors for FFC

The FFS series connectors are designed for surface mounting (SMT) and to meet the demand for high-density packaging. They are miniature connectors with a height of only 2.8mm. Their high contact pressure eliminates fretting corrosion and ensures secure connections. Low insertion force make connection easy.

#### Features -

#### • Surface mountable (SMT)

Because of its small pitch and its ability to be surface mounted, this connector meets the demand for high-density packaging.

#### Double-leaf contact mating enhances reliability through redundancy

The contact is made of phosphor bronze that maintains its spring force in adverse environmental conditions. FFC leads can be inserted with little force, yet the contact pressure is high once they are inserted.

#### • Low profile design

This connector is very small with a mounting height of only 2.8mm.

#### • Simple snap-in action

The FFC is securely connected by simply inserting its leads into the connector.

#### Embossed tape for automatic mounting

The FFS connector is supplied packaged in embossed tape for automatic mounting.

#### Solder tabs

This connector also features reinforcing solder tabs to prevent lifting of the connector during mating and unmating.
