Amphenol® GT Connectors with reverse bayonet coupling for Bombardier

The GT Connector is the preferred connector for the mass transit industry. It was chosen by Bombardier for its heavy duty features and its proven reliability.

This publication was designed for use by Bombardier and Bombardier subcontractors. It is the intention of Amphenol to supply this information in order to simplify the ordering processes of Bombardier for GT Reverse Bayonet connectors. It will be updated as needed to provide the most current information.

Amphenol® GT Reverse Bayonet Coupling Connectors Features:

- Quick positive coupling
- Audible, tactile and visual indication of full coupling
- Waterproof
- No lockwiring required
- High shock and vibration capabilities
- Inserts are made from low smoke/flame retardant or Neoprene
- Operating temperature range:
-55°C to +125°C
- Available in both crimp and solder terminations
- Contacts available in gold and silver plating
- Numerous finishes available
- Black zinc alloy plating (cadmium free) available
- Rugged construction; aluminum or stainless steel components
- Intermateable with existing VG95234 connectors
- 2000 couplings minimum
- UL recognized

For further information on GT Connectors consult Amphenol catalog 12-024 or contact:

ALTERNATE POSITIONING

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate rotations are available as indicated in the chart below.

As shown in the diagram below, the front face of the pin insert is rotated within the shell in a clockwise direction from the normal shell key. The socket insert would be rotated counter-clockwise the same number of degrees in respect to the normal shell key.

Insert Arrangement	Degrees			
	W	X	Y	Z
16-10	90	180	270	-
16S-1	80	-	-	280
18-1	70	145	215	290
18-11	-	170	265	-
18-12	80	-	-	280
20-4	45	110	250	-
20-29	80	-	-	280
22-2	70	145	215	290
22-14	80	110	250	280
24-22	45	110	250	-
24-96	65	-	-	-
28-6	70	145	215	290
28-21	80	110	250	280
28-22	70	145	215	290
32-AF	80	110	250	280
36-10	80	125	235	280
40-35	70	130	230	290
40-56	72	144	216	288

Additional rotations available; consult Amphenol for information.

GT Connectors for Bombardier

part number description

Amphenol GT Part Number System

GT	CL	030	RV	FF	36-10	P	W	(025)
1	2	3	4	5	6	7	8	

1. Contact Style and Insert Material

CL = Crimp with low smoke/flame retardant inserts

2. Shell Style

030 - Square flange receptacle - rear panel mount

06 - Straight plug

08 - 90° angle plug

3. Connector Class - For details see pictorial description at right and see pages X-X for detailed drawings.

No letter designates connector with no adapter, but with threaded rear to accept an accessory attachment.

CFZ - Adapter, jacketed cable clamp, individual wire sealing grommet, environmental

F - Adapter, clamp for individual wires, individual wire sealing grommet, environmental.

RV - Adapter, individual wire sealing grommet, environmental

4. Designation for Mounting Holes Receptacle Only

FF - UN Threads (consult Amphenol)

FM - Metric Threads (consult Amphenol)

No designation for standard through mounting holes.

5. Shell Size and Arrangement

See page 2.

6. Contact Style

P designates pin contacts

S designates socket contacts

7. Alternate Position

W, X, Y and Z - See page 2.

No suffix required for normal position.

8. Connector Modification

(025) Black zinc cobalt

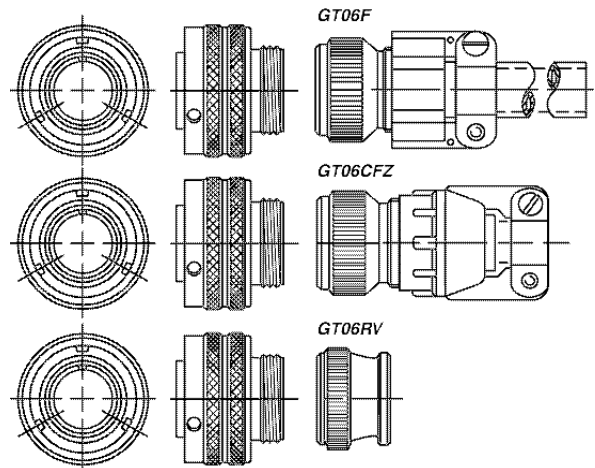

(LC) Less contacts

GT Connector accessories for Bombardier 10-40450, 10-36675, 10-580649 sealing gaskets

PLAIN FLAT GASKET

The Amphenol® plain flat gasket of synthetic rubber material is provided to take complete advantage of waterproof and pressure sealing features. It is for use with the flange mounted receptacle.

SHIELDING GASKET

This flat gasket is provided to give the maximum in connector performance. Its special feature is in providing the maximum radio shielding under difficult conditions of high receiver sensitivity and low signal strength while retaining the sealing characteristics of the plain gasket. This gasket is for use with the flange mounting receptacle.

LOW TEMPERATURE GASKET

This gasket is provided for applications where the major requirement is resistance to the injurious effects of extremely low temperature. Even at temperatures as low as -67°F this gasket retains its resiliency and will seal a pressure differential of 30 psi.

Additional versions of gaskets are available including low smoke zero halogen, and also high temperature and conductive types. Consult Amphenol Industrial Operations, Sidney NY, for further information.

GT Connector accessories for Bombardier plug protection caps

- Protective metal caps which seal the front of plugs
- Includes a chain for retention of the cap at the required location

* 10-580903-XXY

* To complete order number, add shell size and suffix number. For example, shell size 11 with black zinc cobalt plate would be 10-580903-11Y.

GT Connectors

crimp contacts and application tools

Machined from copper alloys and silver-plated for maximum corrosion resistance, with a minimum millivolt drop and a maximum current carrying capacity, the size 16 and 12 socket contacts are of the closed entry design. Crimp contacts are available for all MS insert arrangements and are identified with an Amphenol® proprietary number.

GT Connectors

crimp contacts, cont.

CRIMP CONTACTS

Mating Size	Wire Barrel Size	Allowable Wire Size	Test Current** Amps
16 Short	16	16	13
		18	10
		20	7.5
		22	5
16 Long	16	16	13
		18	10
		20	7.5
		22	5
12	12	12 14	23 17
8	8	8 10	46 33
4	4	4 6	80 60
0	0	0 2	150 125

** Contact ratings as stated are test ratings only. The connector may not withstand full rated current through all contacts continuously. Please note that the electrical data given is not an establishment of electrical safety factors. This is left entirely in the designer's hands as he can best determine which peak voltage, switching surges, transients, etc. can be expected in a particular circuit.

Table I
MIL-SPEC CONTACT ARRANGEMENT SERVICE RATING

MS Service Rating	Recommended Operating Voltage* at Sea Level		Effective Creepage Distance Nom.	Mechanical Spacing Nom.
	DC	AC (RMS)		
Inst.	250	200	1/16	
A	700	500	1/8	1/16
D	1250	900	3/16	1/8
E	1750	1250	1/4	3/16
B	2450	1750	5/16	1/4
C	4200	3000	1	5/16

* The values listed in Table I represent operating values which include a generous safety factor. It may be necessary for some applications to exceed the operating voltages listed here. If this is necessary, designers will find Table II useful for determining the degree to which the recommended values of Table I can be exceeded.

Table II
ALTITUDE VOLTAGE DERATING CHART**

MS Service Rating	Nominal Distance		Standard Sea Level Conditions		Pressure Altitude † 50,000 Feet		Pressure Altitude † 70,000 Feet	
	Airspace	Creepage	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)
Inst.	1/32	1/16	1400	1000	550	400	325	260
A	1/16	1/8	2800	2000	800	600	450	360
D	1/8	3/16	3600	2800	900	675	500	400
E	3/16	1/4	4500	3500	1000	750	550	440
B	1/4	5/16	5700	4500	1100	825	600	480
C	5/16	1	8500	7000	1300	975	700	560

† Not corrected for changes in density due to variations in temperature

** No attempt has been made to recommend operating voltages. The designer must determine his own operating voltage by the application of a safety factor to the above derating chart to compensate for circuit transients, surges, etc.
