Stacking Height 5 to 11mm Half Pitch Connector

FX4 Series

■Features

The FX4 series is a miniature board to board connectors, where the stacking height can be set at the 1mm interval.

Through hole Type

1. Small and Light

The mounting space and weight is reduced about 30%, compared to the conventional product (HRS FX2 series), respectively, and the mounting area about 70% reduced, compared to the conventional one.

2. Stacking Height 5 to 11mm

The board to board stacking height can be set per 1mm from 5mm up to 11mm.

3. Flux Swell Prevention

When solder is dipped, the flux swell from the board rear side is completely prevented.

4. Mis-insertion Prevention and Low Insertion/Extraction Force Mechanism

The connection area is designed to completely prevent the mis-insertion.

Moreover, the low insertion/extraction mechanism is adopted.

■Applications

Computers, peripheral equipments, business equipments, etc.

2. Prefixed Process to Board (Through hole Type)

If the prefixed work is required for mounting on the board, please use the prefixed pin type. (Applicable board thickness $t = 1.6\pm0.1$)

Cautions: When the connector is installed in the board, the dip post is guided into the board through-hole in order to prevent the dip post breakage, and then insert the board in parallel to the connector so as to push in the prefixed pin.
