

# Wiha PicoFinish.

The Comfortable Precision Screwdriver.

Colour-coded drive symbols on the rotating cap for easy recognition of the individual screwdrivers.

The two differently-shaped, multi-component handles have been modified to match the size of the screwdrivers.

The PicoFinish is distinguished by top-quality materials and an ergonomic handle design. The comfortable precision screwdriver with multi-component handle, rapid rotating zone and easy-movement rotating cap is a professional tool for all precision work for confined screw applications. To make things even easier for the user working with tiny screws, we've developed a second, smaller handle. The colour-coded marking of the drive symbol on the rotating cap is also new. This makes it easier to recognise the individual screwdrivers when several are being used at once.

The easy-movement rotating cap protects the palm of the hand.

The blades are made of top-quality chrome-vanadium-molybdenum steel to ensure a particularly long tool life. They are subsequently through-hardened in a controlled process and chrome-plated. The precise ChromTop® tip ensures a secure hold in the screw head.

The Wiha PicoFinish features a durable chrome-vanadium-molybdenum blade.

Wiha PicoFinish:

- Ergonomic handle design with soft zone for comfortable work
- Easy-movement rotating cap for rapid hand action
- Colour-coded marking of the drive symbol for easy identification
- Through-hardened, chrome-plated blade made of chrome-vanadium-molybdenum steel for a long tool life
- Wiha ChromTop® tip guarantees a secure hold in the screw head
- Ideal for all fine, filigree applications in electronics and precision-mechanics applications, as well as for DIY and model-building

## For Slotted Screws.

### 260P PicoFinish Slotted Screwdriver.

**Handle with Rotating Cap and Rapid-turning Zone.**

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.

Wiha ChromTop® finish on tip for a perfect fit every time.

Handle: Wiha PicoFinish handle for rapid rotation.

Application: Ideal for high-precision work with electro-technical and precision components.
