

Off-white, RAL 9002 Black, RAL 9005

#### THE PRODUCT

The round form of the head of the DATEC-CONTROL range of enclosures allows the installation of larger displays with graphics capability.

Particular attention was also paid to the ergonomics of the new design.

The cases are thus very comfortable to hold and easy to operate.

#### **YOUR ADVANTAGE**

Easy to use with a small hand grip area.

Installation of standardised LCDs possible (contact addresses on request).

Display windows protect the fitted display modules and guarantee a high protection class in the display area. Easy assembly with included adhesive foil.

In case of high power requirements, up to 5 AA batteries can be used (M/L).

Lid of battery compartment optionally with latch and / or fixed by screws (XS/S). Push-on end cover can be permanently fixed if needed.

Space for PCMCIA card (M/L), protected mounting – easy access.

#### **APPLICATIONS**

Mobile data collection and transfer via modem, ISDN or infra-red technology.

Measuring and control technology. Digital control technology.

#### **PROTECTION CLASS**

With sealing kit (acc.) and, in version II, in conjunction with the adhesive foil for the display window, protection class **IP 65** is possible with XS and S, as well as **IP 54** with M and L.

#### MAX. SIZE OF PCB

DATEC- CONTROL	L x W/W2 in mm base part	top part
XS	190 x 46/82	150 x 47/83
S	214 x 62/106	213 x 60/106
M	207 x 80/118	113 x 78
L	230 x 80/132	115 x 78

(without battery compartment, cutouts for pillars not taken into consideration)

\*1 installation on existing fixing pillars in the top part or on the PCB. For a list of matching standard LCDs and contact addresses, please see Internet www.okw.com, Products section, link to Product information

- \*2 with individual screen printing, adapted to your visible display cutout as well as to cover the area of adhesive foil, on demand
- \*3 battery compartment holder (②) necessary; the battery compartment snaps safely into position when it is pushed in
- \*<sup>4</sup> for mounting the battery compartment holder there are two positions possible (upwards/downwards oriented) according to the requirements of your components configuration PCBs etc.; with upwards oriented assembly, the end plate for electronic area is required as a support (see also picture page 19)
- \*<sup>5</sup> new: additional ridge in the station for desk case application serves for easy remounting and bonding the contacts (④) by the weight of the hand part
- \*8 for practical use, machining is required for the following parts: cases DATEC-CONTROL XS and S (lacator of a drill) as well as DATEC-CONTROL M and L (holes necessary for fitting), station M and L (holes necessary for fitting)
