RA CONNECTOR (IDC)

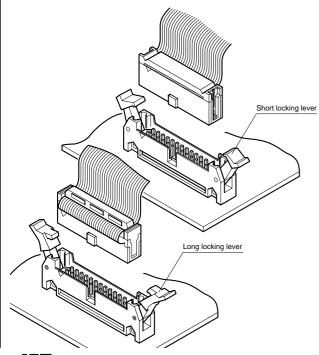

Disconnectable Insulation displacement connectors for 1.27mm pitch ribbon cables

JST IDC

54mm

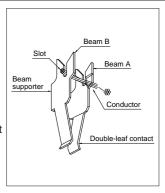

To keep pace with the rapid developments in electronics, internal and external connection systems are naturally increasing in density. At the same time, labor requirements and overall costs must be minimized. RA connectors meet all of these requirements, while providing increased reliability. These connectors, whose materials, shapes, dimensions, and surface treatments have been carefully selected, are based on the latest technological information that has been accumulated and improved over years of experience in crimping connection technology.

Features -

• Twin U-slot ID section

The twin U-slot is the most important IDC element in JST's RA connectors. As shown in the figure, wire conductors are connected between the slots of U-shaped parallel beams, and the distance between each adjacent pair of beams is designed to be one third of the pitch of wire strands.

• Two-die processing and selective gold plating

Two precision dies are used to blank and form the contacts. After the first die blanks the contacts, they are gold plated at crucial points. Then, the contacts are formed by the second die. This eliminates unnecessary gold-plating and overall costs are minimized. This innovation is another example of our industry-leading technology.

Selective gold-plated posts

Header posts are also selectively gold-plated. While square wire material is used for production of conventional posts in loose pieces, continuous flat strip is used for production of our post in chain form. This allows selective gold-plating and provides cost reduction.

Cost-efficient

JST's unique technology allows it to produce connectors that are extremely reliable and cost-efficient.

Interchangeable cables and connectors

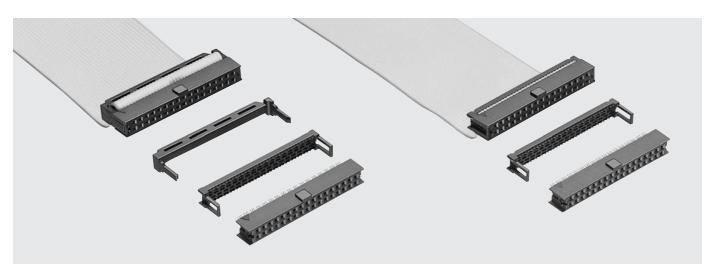

RA connectors fit commercially available 1.27 mm pitch flat ribbon cables. A variety of ribbon cables are offered according to the purpose. Moreover, the RA series receptacles and header are interchangeable with the similar type of connectors commercially available. Contact JST before procuring cables and other manufacturer's mating connectors.

- * Refer to "General Instruction and Notice when using Terminals and Connectors" at the end of this catalog.
- * Contact JST for details.
- * Compliant with RoHS.

Standards —

- Recognized E60389
- G: Certified LR20812

Receptacle

Specifications

Characteristics

| Current rating | 1.0 A AC, DC | |
|-----------------------|--|--|
| Voltage rating | 300 V AC, DC | |
| Temperature range | (including temperature rise in applying electrical current) -55°C to +125°C (gold-plated) -55°C to +105°C (tin-plated) | |
| Contact resistance | Initial value/10 mΩ max. (gold-plated) 40 mΩ max. (tin-plated) After environmental tests/ 15 mΩ max. (gold-plated) 50 mΩ max. (tin-plated) | |
| Insulation resistance | 5,000 MΩ min. | |
| Withstanding voltage | 500 VAC/5 seconds | |
| Applicable wire | AWG #28, 1.27 mm pitch ribbon cable | |

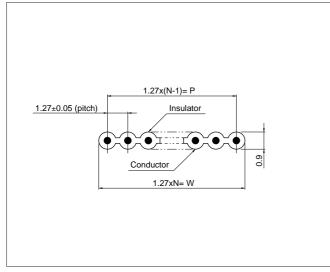

Materials

| Contact | Phosphor bronze Nickel-undercoated, selective gold-plated Copper-undercoated, tin-plated (reflow treatment) |
|--------------------|--|
| Receptacle housing | Glass-filled PBT, UL94V-0, black |
| Cover housing | Glass-filled PBT, UL94V-0, black |
| Strain relief | Glass-filled PBT, UL94V-0, black |

*Contact JST for details.

Applicable cables -

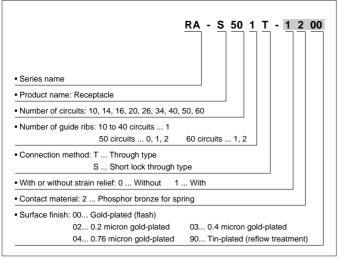

Ribbon cables conforming to the following specifications can be used with RA connector receptacles. Contact JST for details.

| No.of | Dimensional tolerance (mm) | | |
|----------------|--|------|--|
| conductors (n) | Р | W | |
| 10 to 14 | ±0.18 | ±0.3 | |
| 16 to 26 | ±0.28 | ±0.3 | |
| 34 to 60 | ±0.38 | ±0.3 | |
| Conductor | AWG #28 stranded wire Construction: 7/0.127 mm dia. Material: Tin-plated annealed copper wire AWG #28 solid wire Construction: 0.32 mm dia. Material: Tin-plated annealed copper wire | | |
| Insulator | Soft vinyl chloride | | |

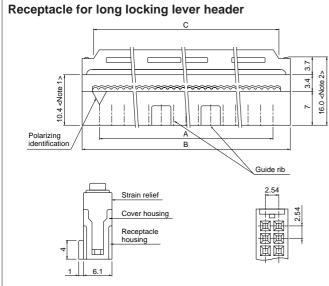

Note: N --- Number of circuits

Model number identification

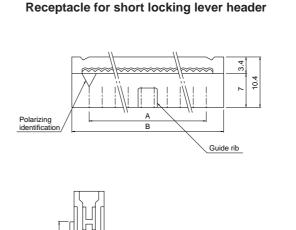

Note:

The standard gold-plated type is identified by the suffix number [-1200], but this suffix number is usually omitted. The gold-plated type identified by [-0200] is indicated by [-0] for short. Other types must be identified by the full code number. Special types do not conform to the above coding system.

<Note 1>: Height without strain relief <Note 2>: Height with strain relief
