

Features:

- This is a highly effective cleaning solvent for electrical and electronic parts and components
- It leaves no residue, and is non-corrosive to metals and safe on most plastics and fibres

Applications

IPA is a universally recognised electronic cleaning solvent which is suitable for use on a wide variety of electronic equipment and components including tape heads, disc drives, PCB's, optical equipment, lenses, mirrors and precision instruments. It evaporates after application and does not leave any residue

It is considered to be safe on metals and most plastics. If unsure of plastic compatibility, always test on an inconspicuous area before general use

Note

It is flammable not for use on live electrical equipment. Allow solvent to fully evaporate before operating the equipment

Technical Information

| | |
|---------------------------|---|
| Appearance | Clear, colourless liquid |
| Odour | Alcohol |
| SG at 25°C | 0.801 |
| Compatibility | May affect certain plastics |
| Solubility | Soluble in water |
| Flammability | Classified as flammable under current EC regulations |
| Auto-ignition Temperature | 400°C |
| Flashpoint | Not applicable in sealed aerosol 12°C for 1 litre metal can |

Storage

The product may be stored at normal temperatures and has a shelf life of not less than 36 months with correct storage. Aerosols should always be stored below 50°C, away from direct heat and naked flames

Part Number Table

| Description | Part Number |
|-----------------------------|-------------|
| IPA Solvent, 400 ml Aerosol | PPC103 |
| IPA Solvent, 1 Litre Tin | PPC104 |
