

900 Series: The Chiseldriver

With impact cap and pound-thru blade. Extra tough.

The Wera 900 series, the chiseldriver, is the tool for tough jobs in the workshop and in industry.

The tool is so rugged that seized screws can be loosened, and seized hose clamps can be knocked off. It can also be used for putting holes into the wall, if the chisel cannot be found.

In addition, the blades are hardened extra tough. This prevents material from splintering, thus avoiding injuries.

The hex bolster allows for the use of an open-jawed or ring spanner, to transfer higher torque.

Naturally, the 900 series features the proven Kraftform® handle. The handle fits perfectly in the hand, because it is shaped by the hand. Every muscle will grip, and the whole hand is in contact with the handle.

New materials used for the characteristic hard and soft zones deliver faster, more powerful and less tiring screw-driving action.

This is made possible by the pound-thru hexagonal blade, made from bits material 73 Mo V 5 2 together with the integral impact cap.

The hex bolster allows for the use of an open-jawed or ring spanner, to transfer higher torque.

For driving, loosening, knocking off and chiselling

info

Rugged: For screw-driving, loosening, knocking off and chiselling

Safe: Through integral impact cap, pound-thru hexagonal blade, and extremely high-grade material

Powerful: Hex bolster for the use of an open-jawed or ring spanner, to transfer higher torque

Ergonomic design: Kraftform® handle for faster, more powerful and less tiring screw-driving action

Dimensionally accurate: Through Wera black point drive tip

900 Series: The Chiseldriver

With impact cap and pound-thru blade. Extra tough.

932 A Slotted Screwdriver

Application: For slotted screws
Blade: Hexagon "pound-thru" with impact cap, hexagonal bolster
 from 0,8 x 4,5, mat nickel
Tip: DIN 5264-A, ISO 2380, Black Point

Handle: Kraftform® with anti-roll protection, three components, Sizes 2,0 x 12,0; 2,5 x 14,0 Kraftform®, Weralit® II, one component
