Product

Within the markets Measurement, HVAC, Building and Control, and Home Appliances/White Goods, humidity modules are required which are capable to translate the signals of the robust IST humidity sensors into commonly used standards and provide a calibrated sensor signal.

In their current form factor the modules of the linPicco series deliver. Contrary to existing humidity modules or fully integrated solutions the linPicco series unifies advantages of both worlds, avoiding their disadvantages: The high precision measurement of humidity with discrete sensors (high stability due to wide active sensor area) combined with calibrated and linearized output signal.

Advantages

- Calibration free
- Ready to use
- Precise humidity measurement
- Drift stable thanks to wide sensor area
- Available with optional temperature sensor
- Smallest dimensions
- Mechanical robust and eaysy to integrate
- Different output options on request
