Sealed Snap Action Switch

Watertight Miniature Snap Action Switch

- High-quality watertight miniature Snap Action switch. Switch Body meets IP67 (IEC 529) requirements
- Monoblock construction assures high sealing capability and is ideal for dusty places or where water is sprayed
- Wide operating temperature range of -40°C to 85°C
- Perfect for the automobile, agriculture machinery, automatic vending machine, refrigerator, ice-manufacturing, hot-water supply, air conditioner, and industrial equipment, which require highly environment-resistive capabilities
- RoHS Compliant

Ordering Information

4. Terminals

H, HS: Solder terminals (HS for UL and CSA approval) D, DS: PCB terminals (DS for UL and CSA approval) T, TS: Quick-connect terminals (#110) (TS for UL and CSA approval)

- M, MS: Molded lead wires (MS for UL and CSA approval)
- 5. Length of the molded lead wire
 - None: 300 mm
 - -0: 1,000 mm (non-Safety Standards approved models)

■ Characteristics

| Item | | D2SW-3 | D2SW-01 | | |
|-------------------------------|--|---|--|--|--|
| Operating speed | | 0.1 mm to 1 m/second (at pin plunger) | | | |
| | | Mechanical: 300 operations/minute max. Electrical: 30 operations/minute max. | | | |
| Insulation resistance | | 100 MΩ min. (at 500 VDC) | | | |
| Contact resistance | | 30 m Ω max. for terminal models | 50 m Ω max. for terminal models | | |
| | | 50 m Ω max. for lead wire models | 70 m Ω max. for lead wire models | | |
| Dielectric strength (See n | ote 2) | 1,000 VAC, 50/60 Hz for 1 min. between terminals of the same polarity | 600 VAC, 50/60 Hz for 1 min. between ter- minals of the same polarity | | |
| | | 1,500 VAC, 50/60 Hz for 1 min. between current-carrying metal parts and ground, and between each terminal and noncurrent-carrying metal parts | | | |
| Vibration resistance (See | note 3) | Malfunction: 10 to 55 Hz, 1.5 mm double amplitude | | | |
| Shock resistance (See note 3) | | Destruction: 1,000 m/s ² (approx. 100G) max. Malfunction: 300 m/s ² (approx. 30G) max. | | | |
| Ambient operating tempe | rature | -40° to 85°C (at 60% RH) with no icing | | | |
| Ambient operating humid | lity | 95% max. (for 5°C to 35°C) | | | |
| Degree of protection | | IEC IP67 (excluding the terminals on terminal models) | | | |
| Degree of protection agai | nst electric shock | Class I | | | |
| Proof tracking index (PTI) | | 175 | | | |
| Life expectancy Mechanical | | 5,000,000 operations min. at 60 operations per minute | | | |
| | Electrical (30 operations per minute) | 200,000 operations min. (3 A at 125 VAC) 200,000 operations min. 100,000 operations min. (2 A at 250 VAC) (at rated resistive load) | | | |
| Weight | Terminal model | Approx. 2 g | | | |
| | Lead wire model | Approx. 10 g | | | |

Note: 1. Data shown are of initial value.

2. The dielectric strength shown is measured using a separator between the switch and metal mounting plate

3. For pin plunger models, the above values apply for use at the free position, operating position, and total travel position. For models with levers, the values apply at the total travel position.

■ Ratings (reference values)

D2SW-3

| Rated Voltage | | Non-inductive load (A) | | | | Inductive load | | | | |
|---------------|--------|------------------------|-------|--------------------------|-------|----------------|----------------|-------|------------|--|
| | Resist | Resistive load | | Resistive load Lamp load | | Indu | Inductive load | | Motor load | |
| | NC | NO | NC | NO | NC | NO | NC | NO | | |
| 125 VAC | 3 A | | 1 A | 0.5 A | 1 A | 0.5 A | 1 A | 0.5 A | | |
| 250 VAC | 2 A | | 0.5 A | 0.3 A | 0.5 A | 0.3 A | 0.5 A | 0.3 A | | |
| 30 VDC | 3 A | | 1 A | | 1 A | | 1 A | | | |

D2SW-01

| Rated Voltage | Non-inductive load | | | | Inducti | ve load | | |
|---------------|--------------------|---------|-----|--------|---------|---------|------|--------|
| | Resisti | ve load | Lam | o load | Inducti | ve load | Moto | r Ioad |
| | NC | NO | NC | NO | NC | NO | NC | NO |
| 125 VAC | 0.1 A | | — | | — | | — | |
| 30 VDC | 0.1 A | | — | | — | | — | |

Note: 1. The resistive load ratings apply under the following test conditions:

Ambient Temperature = $20\pm 2^{\circ}$ C, Ambient Humidity = $65\pm 5^{\circ}$, Operating frequency = 30 operations/min.

2. The above current ratings are the values of the steady-state current.

3. Inductive load has a power factor of 0.7 min. (AC) and a time constant of 7 ms max. (DC).

4. Lamp load has an inrush current of 10 times the steady-state current.

5. Motor load has an inrush current of 6 times the steady-state current.

Approvals

Consult your OMRON sales representative for specific models with standard approvals.

UL Recognized, CSA Certified

| Rated Voltage | D2SW-3 | D2SW-01 |
|---------------|--------|---------|
| 125 VAC | 3 A | 0.1 A |
| 250 VAC | 2 A | |
| 30 VDC | 3 A | 0.1 A |

EN 61058-1 (VDE Approval)

| Rated Voltage | D2SW-01 |
|---------------|---------|
| 125 VAC | 0.1 A |

Testing conditions: 5E4 (50,000 operations), T85 (0°C to 85°C)

Engineering data

Mounting

All switches may be panel mounted using M2.3 mounting screws with plane washers or spring washers to securely mount the switch. Tighten the screws to a torque of 0.23 to 0.26 N·m.

Panel Mounting

Two, 2.4-dia. mounting hole or M2.3 screw hole

■ Structure

*Indicates the color of the lead wire.

Contact Specifications

| Item | D2SW-3 | D2SW-01 | |
|------------------------------------|--------------------------------|---------------|--|
| Specification | Rivet | Crossbar | |
| Material | Silver | Gold alloy | |
| Gap (standard value) | 0.5 mm | | |
| Inrush current | NC: 20 A max. NO: 10 A max. | 1 A max. | |
| Minimum applicable load (see note) | 160 mA at 5 VDC | 1 mA at 5 VDC | |

Note: Minimum applicable loads are indicated by N standard reference values. This value represents the failure rate at a 60%

 (λ_{60}) reliability level (JIS C5003). The equation λ_{60} =0.5 x 10⁻⁶ / operations indicates that a failure rate of 1/2,000,000 operations can be expected at a reliability level of 60%

Precautions

Be sure to read the precautions and information common to all Snap Action and Detection Switches, contained in the Technical User's Guide, "Snap Action Switches, Technical Information" for correct use.

Correct Use

Operation stroke

Make sure that the switching object is perfectly separated from the actuator when the switch is not operated and the actuator is pressed appropriately by the switching object when the switch is operated.

The switch should be set so that its stroke will be within the rated OT when the switch is operated.

Handling

Install the switching object so that its moving direction is the same as that of the actuator. With the pin plunger models, set the switch so that the plunger can be actuated from directly above. Since the plunger is covered with a rubber cap, applying a force from lateral directions may cause damage to the plunger or reduction in the sealing capability.

Handle D2SW models with pin plungers with care so that the sealing rubber parts around the pin plungers will not be damaged.

Make sure that there is no icing when using the D2SW at low ambient temperatures.

Using Microloads

Using a model for ordinary loads to switch microloads may result in faulty operation. Instead, use the models that are designed for microloads and that operate in the following range;

However, even when using microload models within the operating range shown above, if inrush current or inductive voltage spikes occur when the contact is opened or closed, then contact wear may increase and so decrease the service life. Therefore, insert a contact protection circuit where necessary.

■ Cautions

Degree of Protection

The D2SW was tested under water and passed the following watertightness test, which however, does not mean that the D2SW can be used in the water. JIS C0929 (rules for testing the watertightness of electrical devices and materials), class 7 (watertightness test). Refer to the following illustration for the test method.

IEC Publication 529, class IP67. Refer to the following illustration for the test method.

Note: The object to be tested is left in the water for 30 minutes on condition that the distance between the surface of the water and the top of the object be 15 cm minimum, and the distance between the surface of the water and the bottom of the object be 1 m minimum.

Protection Against Chemicals

Prevent the switch from coming into contact with oil and chemicals. Otherwise, damage and deterioration to the switch materials may occur.

Soldering

When soldering a lead wire to a terminal of the D2SW, use a soldering iron with a maximum capacity of 30 W and do not take more than 5 seconds to solder the lead wire, otherwise the characteristics of the D2SW may be altered.
