## Wiha ProStar Holder.

## Right Key by Sliding Mechanism.

Practical bolster plate for all small keys.

With ProStar, it is possible to open the holder with only one hand thanks to the new sliding mechanism and the tool thus offers maxi-mum-comfort working.

The optimum user benefit is manifasted in the unique mechanism, which can be used to remove each key individually without having to move any of the other keys.

Thanks to the compact design, the ProStar takes up little space on the bench or in the toolbox.

Push red upper part to the right.

Tip the required key forwards...

...and take it out.

## Wiha ProStar:

- New sliding mechanism for opening the holder with only one hand
- Quick removal of each individual key without having to move another key
- Compact design saves space on the bench and in the toolbox
- High-quality plastic material, impact-resistant, cadmium free
- New colour-coding system for immediate identification:

Red upper part: 9 sizes in metric dimensions
Yellow upper part: 13 sizes in inchesGreen upper part:
13 TORX® ${ }^{\circledR}$ keys

## Wiha Hex L-Keys with MagicRing ${ }^{\circledR}$.

## Ball point Hex L-Keys, Metric.

## 369R

Ballpoint Hex L-Key, Long. With MagicRing ${ }^{\circledR}$.
