

Flat Relays that Switch 10A/15A Loads Power

- · Ideal for switching power in household appliances or for outputs from industrial devices.
- Subminiature dimensions: $16 \times 22 \times 11$ mm (L × W × H).
- High-sensitivity models available with low power consumption (150 mW).
- Standard model conforms to UL/CSA standards.
- Fully sealed models are available
- Quick-connect terminal models are also available (#187 load contact terminals).

RoHS Compliant

oltage specifications. Note 3. High-capacity models with a fully sealed structure are not available.

Note 4. Standard or high-sensitivity models with quick-connect terminals are not available.

Rarings

	Item	Rated current (mA)	Coil resistance (Ω)	Must-operate voltage (V)	Must-release voltage (V)	Max. voltage (V)	Power consumption (mW)
Classification	Rated voltage	(117.7)	()		% of rated voltage		()
Standard,	5 VDC	40	125			150% (standard)/	
high-capacity,	12 VDC	16.7	720	75% max.	10% min.	130% (high-capacity,	Approx. 200
or quick-connect terminals	24 VDC	8.3	2,880	7070 max.	1070 1111	quick-connect terminals) (at 23°C)	Applox. 200
	5 VDC	30	167			150%	
High-sensitivity	12 VDC	12.5	960	80% max.	10% min.	(at 23°C)	Approx. 150
	24 VDC	6.25	3,840			(at 25 C)	

Note 1. The rated current and coil resistance are measured at a coil temperature of 23°C with a tolerance of ±10%.

The operating characteristics are measured at a coil temperature of 23°C.
 The "maximum voltage" is the maximum voltage that can be applied to the relay coil.

■Approved Standards

•The following UL-, CSA-, and EN/TÜV-certifying ratings differ from the performance characteristics of the individual models. **UL Recognized: SA** (File No. E41515) **CSA Certified: (**File No. LR31928)

Model	Contact form	Coil ratings	Contact ratings	Number of test operations
		5 to 100	15 A, 125 VAC (General purpose) at 40°C	
G5CA SPDT-NO (1a)	VDC	10 A, 250 VAC (General purpose) at 40°C	100,000	
			10 A, 30 VDC (Resistive) at 40°C	

Model	Contact form	Coil ratings	Contact ratings	Number of test operations
		5 to 100	15 A, 125 VAC (General purpose) at 40°C	
G5CA	SPDT-NO (1a)	5 to 100 VDC	10 A, 250 VAC (General purpose) at 40°C	100,000
			10 A, 30 VDC (Resistive) at 40°C	

EN Certified/TÜV (Certification No. R50214486)

Model	Contact form	Coil ratings	Contact ratings	Number of test operations
	SPDT-NO	5, 6, 12,	15 A, 125 VAC (cos∳ = 1.0) at 85°C	
G5CA	(1a)	24, 48 VDC	10 A, 250 VAC (cos∳ = 1.0) at 85°C	100,000
			10 A, 30 VDC (0 ms) at 85°C	

Precautions

Please refer to "PCB Relays Common Precautions" for correct use.

Correct Use

Mounting

 Make sure that sufficient space is provided between relays when installing two or more relays side by side to facilitate heat dissipation.
 Insufficient heat dissipation may result in the relay malfunctioning.

Quick-connect Terminal Connections

- Do not pass current through the PCB of the load contact terminals (quick-connect terminals).
- The terminals are compatible with Faston receptacle #187 and are suitable for positive-lock mounting. Use only Faston terminals with the specified numbers. Select leads for connecting Faston receptacles with wire diameters that are within the allowable range for the load current. Do not apply excessive force to the terminals when mounting or dismounting the Faston receptacle. Insert and remove terminals carefully one at a time. Do not insert terminals on an angle, or insert/remove multiple terminals at the same time.

The following positive-lock connectors made by AMP are recommended. Contact the manufacturer directly for details on connectors including availability.

Туре	Receptacle terminals *	Positive housing
	AMP 170330-1	AMP 172074-1
	(170324-1)	(natural color)
#187	AMP 170331-1	AMP 172074-4
terminals	(170325-1)	(yellow)
(width:	AMP 170332-1	AMP 172074-5
4.75 mm)	(170326-1)	(green)
		AMP 172074-6
		(blue)
		•

The numbers shown in parentheses are for air-feeding.

Charged Terminals

The section marked with dotted circles (indicated by arrows) in the following diagram includes the charged terminals of the relay.
When the relay is mounted on a PCB, make sure that there are no metal patterns on the section of the PCB facing the portion of the relay shaded in the following diagram.

Other Precautions

- The G5CA is a power relay designed for applications switching power loads such as heaters in electric household appliances. Do not use the G5CA to switch micro loads less than 100 mA, such as in signal applications.
- Use fully sealed models if the relays will require washing. Flux-protection models may malfunction or the relay's performance may be otherwise adversely affected if cleaning fluid enters the relay.

Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.
Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperly. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

Note: Do not use this document to operate the Unit.
