## **CERTIFICATE NUMBERS**

UL/cUL	E347230
ATEX	PTB 08 ATEX 1053 U PTB 08 ATEX 1003 U

## **APPLICABLE STANDARDS**

Products	Applicable Standards	Mark	Certifications
Pushbuttons Selector Switches Key Selector Switches Pilot Lights	EN60947-5-1	C€	EU Low Voltage Directive
Farmer Charles	FNCODAZ E E	TUV	TÜV SÜD
Emergency Stop Switches	EN60947-5-5	C€	EU Low Voltage Directive

## **PRODUCT DESCRIPTION**

Complying with UL and ATEX Directives for hazardous environments, new 30mm EU2B Hazardous Location Switches provide increased safety for your applications.

Available models include:

- Pushbuttons
- Pilot Lights
- Selector Switches
- Key Selector Switches
- Emergency Stop Switches
- Meters

### **KEY FEATURES**

- Class I, Zone 1/Division 2
- Applicable in explosive gas atmospheres (AEx de IIC T6 Gb)
- UL Type 4X rated
- Up to 3 contact blocks
- Selector switches available with lever or key
- Selector switches available with overlapping contacts
- Exposed and finger-safe (IP20) screw terminals available

IECEx is pending approval

1

# **SPECIFICATIONS**

## **General Specifications**

Degree of Protection	IP65 (IEC60529), Type 4X					
Insulation Resistance	100 MΩ minimum (500V DC megger)					
Operating Temperature	-20 to +50°C (no free	ezing)				
Operating Humidity	45 to 85% (no conder	nsation)				
Altitude	2,000m Maximum					
Pollution Degree	3					
Shock Resistance	Operating Extremes	100-m/s <sup>2</sup> Emergency Stop Switch: 150-m/s <sup>2</sup> (without Meter)				
	Damage Limits	1000-m/s <sup>2</sup>				
Vibration Resistance	Operating Extremes	5 to 55-Hz, amplitude 0.5 mm Emergency Stop Switch: 5 to 500-Hz, amplitude 0.35-mm, acceleration 50-m/s² (without Meter)				
vibi audii nesistance	Damage Limits	30Hz, amplitude 1.5-mm Emergency Stop Switch: 5 to 500-Hz, amplitude 0.35-mm, acceleration 50-m/s <sup>2</sup>				

## **Contact Rating (Switches)**

Rated Insulation Voltage (Ui)				600V				
Rated Thermal Current (Ith)			10A*	10A*				
Rated Operating Voltage (Ue)			24V	120V	240V	500V		
	AC 50/60Hz	Resistive Load (AC12)	10A*	10A*	6A	2.8A		
Rated Operat-		Inductive Load (AC15)	10A*	6A	3A	1.4A		
ing Current (le)	DC	Resistive Load (DC12)	8A	2.2A	1.1A	_		
		Inductive Load (DC13)	4A	1.1A	0.55A	_		

Note: Up to 2 contacts (per control unit): 10A

3 contacts (per control unit): 9A

Minimum applicable load: 3V AC/DC, 5mA

Applicable operating locations may vary according to operating conditions and load types.

Contact Rating	Thermal Continuous		Maximum current, Amperes					Maxir Volt-Ar			
Code	Test Current	120	Volt	240	Volt	480	Volt	600	Volt	600	Volt
Designation	Amperes	Make	Break	Make	Break	Make	Break	Make	Break	Make	Break
A600	10	60	6.00	30	3.00	15	1.5	12	1.2	7200	720

#### **Switches**

Rated Insulation Volta	age	600V	
Contact Resistance		$50m\Omega$ maximum (initial value)	
Impulse Withstand Voltage (Uimp)		6kV	
Insulation Resistance		$100M\Omega$ minimum (500V DC megger)	
Short-Circuit Protecti	ion	250V/10A fuse (Type aM IEC60269-1/IEC60269-2)	
<b>Conditional Short-Cir</b>	cuit Current	1,000A	
	Pushbutton	1,000,000 operations minimum	
Mechanical Life	Selector Switch	500,000 operations minimum	
Wednamear Life	Key Selector Switch	500,000 operations minimum	
	<b>Emergency Stop Switch</b>	50,000 operations minimum	
	Pushbutton	250,000 (switching frequency 1800 operations/h)	
Electrical Life	Selector Switch	250,000 (switching frequency 900 operations/h)	
Electrical Life	Key Selector Switch	250,000 (switching frequency 900 operations/h)	
	Emergency Stop Switch	50,000 (switching frequency 900 operations/h)	
Minimum Operator Stroke Required for Direct Opening Action	Emergency Stop Switch	7.0mm	
Maximum Operator Stroke	Emergency Stop Switch	9.0mm	

Note: Contacts will bounce during operation of pushbuttons and selector switches (reference value: 20-ms). Be sure to take contact bounce time into consideration when designing a control circuit.

# **Pilot Lights**

Rated Insulation Voltage (Ui)		500V
Poted Operating Voltage (Us)	Voltage	6V, 12V, 24V AC/DC
Rated Operating Voltage (Ue)	Transformer	120V, 230V, 240V, 380V, 480V AC
Impulse Withstand Voltage (Uimp)		4kV
Insulation Resistance		100 MΩ minimum (500V DC)
Frequency		50/60Hz
Dower Concumption (onney)	Full Voltage	0.3W
Power Consumption (approx.)	Transformer	1.5VA
Life (reference value)		Approx. 40,000 hours

Note: Because the built-in LED lamp is a high-brightness version, the lamp may light dimly due to induction even when power is off.

## Meters

Accu	racy Class	2.5				
Insul	ation Resistance	100 M $\Omega$ minimum (500V DC megger)				
	Rated Insulation Voltage (Ui)	300V				
ē	Operation	Moving core				
net.	Impulse Withstand Voltage (Uimp)	4kV				
ammeter	Power Consumption	1VA				
ā	Measurement	5A, 10A, 30A, 50A, etc				
AC	Input (CT Ratio)	1A, 5A				
	Extended Memory	3 times, etc				
_	Rated Insulation Voltage (Ui)	150V				
e e	Operation	Moving coil				
ammeter	Impulse Withstand Voltage (Uimp)	2.5kV				
аш	Input	0 to10V DC, 4 to 20mA, etc.				
2	Power Consumption	0.15W				
_	Consumption Current	1mA				

Note: Use a commercially available CT (current transformer) for all AC ammeters, and install the CT in a non-hazardous location.

### **PART NUMBERS**

#### **Pushbuttons**

#### **Part Number Structure**

Key is removable in all maintained positions. Specify key removal position in place of ③ in the part number. See table.

Specify a terminal style in place of ④ in the part number: F (Finger-safe terminal), C (Exposed screw terminal) Key Removable Option Codes (3-Position)

The key can be released in any maintained position.

Code	Description
Α	Key removable in any position
В	Key removable in left and center positions
С	Key removable in center and right positions
D	Key removable in center position
E	Key removable in left and right positions
G	Key removable in left position
Н	Key removable in right position)

### Meters

# Meters

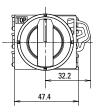

Shown with finger-safe contacts

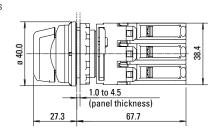

## **Selector Switches**

Shown with finger-safe contacts

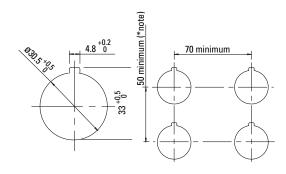

## **Mounting Hole Dimensions**

Panel thickness: 1.0 to 4.5 mm.

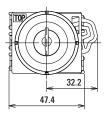

\*Note: The meter can be mounted on the top mounting holes of a standard 50mm mounting centers. The meter can be mounted on any mounting hole with

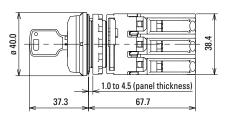

a 70mm or larger mounting center.

## **Key Selector Switch**

Shown with finger-safe contacts

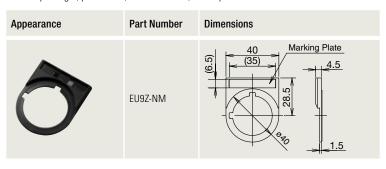

## **ACCESSORIES**

All dimensions in mm

### **Nameplates**

Used for pilot light, pushbutton, selector switch, and key selector switch.

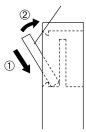

#### **Nameplate Inserts**

Appearance	Legend	Part Number
	Blank	EU9Z-NP0
HAND OFF AUTO	ON	EU9Z-NP1
HAND OFF AUTO	OFF EU9Z-NP2	EU9Z-NP2
	START	EU9Z-NP3
ON	STOP	EU9Z-NP4
	OFF-ON	EU9Z-NP31
OFF	HAND-AUTO	EU9Z-NP35
	HAND-OFF-AUTO	EU9Z-NP53

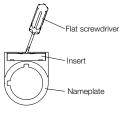

Material: Aluminum

#### Installing the Insert to the Nameplate

# Insert

To remove the Insert, insert a flat screwdriver between the Insert and Nameplate.

## **Rubber Boots**

Appearance	Description/Usage	Part Number
For Flush Pushbuttons	Not for use with name plate	EU9Z-DB1
For Flush Pushbuttons	For use with name plate	EU9Z-DB1N
For Extended Pushbuttons	Not for use with name plate	EU9Z-DB2
For Extended Pushbuttons	For use with name plate	EU9Z-DB2N

Note: Rubber boot must be mounted on flush or extended pushbuttons to achieve UL Type 4X rating

## **Emergency Stop Switch Nameplate Stickers**

Appearance	Legend	Part Number	Dimensions
	Blank	EU9Z-NVS0	040.5
STOP	Emergency Stop	EU9Z-NVS27	ENERGENC) 058

Material: synthetic paper Background: yellow Legend: black

#### **Padlock Cover**

EU2B-YB2 extended pushbutton: to maintain latched status
EU2B-YB1 flush pushbutton/EU2B-YSK key selector switch: to prevent operation

Appearance	Part Number	Dimensions
	EU9Z-PC	32.1

Material: Stainless Steel

## **Emergency Stop Switch Padlock Cover**

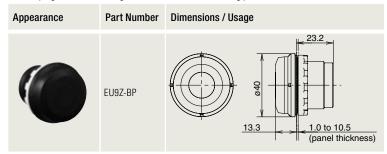

Used with EU2B-YBV emergency stop switch to maintain the switch in the latched status.

Appearance	Part Number	Dimensions
	EU9Z-PCE	Base 9 32.2 32.2

Coating: yellow Material: Stainless Steel

## **Mounting Hole Plug**

Used to plug unused mounting holes (ø30.5) on the mounting panel.

### **Buttons**

Appearance	Style	Part Number	<b>Button Color Code</b>
	Flush	HW1A-B1⊕	Specify a color code in place of ①
	Extended	HW1A-B2①	in the Ordering Number. R:red G:green B:black Y:yellow
	ø40 Mushroom	HW1A-B4①	W:white S:blue

Material: Polyacetal

#### Lenses

Appearance	Lens Color	Part Number
	Red	EU9Z-LR
	Green	EU9Z-LG
	Amber	EU9Z-LA
	Yellow	EU9Z-LY
	White	EU9Z-LW
	Blue	EU9Z-LS

Material: AS resin (gasket supplied)

#### **LED Lamps**

Operating	Curre	nt Draw	Part	Illumination Color Code	Base
Voltage	AC	DC	Number	mammation color codo	Duoo
6V AC/ DC±10%	8mA	7mA (A, R, W) 5.5mA (G, PW, S)	LSTD-6①	Specify a color code in place of ① in the part number	
12V AC/ DC±10%	11mA	10mA	LSTD-1①	R:red G:green A:amber PW:white S:blue Use a white (PW) LED with	BA9S/13
24V AC/ DC±10%	11mA	10mA	LSTD-2①	yellow (Y) lens.	

### **OPERATING INSTRUCTIONS**

## Wiring

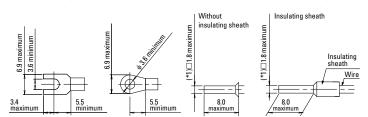

## **Applicable Wires**

Stranded wire: 1.5 to 2.5 mm², solid wire:  $\emptyset$ 1.2 to  $\emptyset$ 1.6 mm (AWG16 to 14) Note: Do not connect more than 2 wires to the same terminal.

## **Applicable crimping terminal**

Ring and spade terminals cannot be used with IP20 finger-safe terminal blocks.

When connecting 2 ferrules to the EU2B control unit, use ferrules without insulating sheath.

Recommended crimping terminal (WAGO) Ferrule with insulating sheath: 216-204 Ferrule without insulating sheath: 216-104 Crimping plier: 206-204

### **Recommended Tightening Torque**

EU2B control units (M3.5): 1.0 to 1.3 N·m

## Warning

Incorrect wiring may cause fire hazard. Observe the following conditions.

- Be sure to install an insulating sheath on the crimping terminal or the crimping terminal with insulation.
- When connecting solid wires or stranded wires directly, strip the insulation, mentioned below, and insert the wire all the way in.

EU2B Control units: 8.6 mm maximum

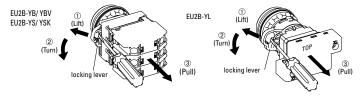

Crimping terminal: 8 to 9 mm  $\,$ 

- When using stranded wires, make sure that there are no wire whiskers.
- Make sure that the spade crimping terminals and ferrules are inserted all the way in.

#### Unit

To remove the contact unit or the lamp unit from the operator, pull the protruding yellow part of the locking lever outwards as shown in the figure below using a screwdriver, and turn it to the left. The contact unit or lamp unit can be removed.

When the contact unit is removed from the emergency stop switch operator, the NO contact closes and the NC contact opens.

Do not turn the locking lever when the contact unit is removed from the operator (the red indicator is protruding out. See the figure below) or the switch can be damaged.

#### Panel mounting for the operator, lens unit and meter

Remove the locking ring from the operator and check that the rubber gasket is in place. Insert the operator from the panel front into the panel hole. Place the projection on the operator with TOP marking upward and the recess on the mounting panel in the same direction. (The meter has no projection.)

Tighten the locking ring using ring wrench XN9Z-T1 to a torque of 2.5 Nm. When using a nameplate or padlocking cover, install it between the operator and panel. Make sure that the groove of the namplate or padlocking cover and the projection on the TOP marking of the operator are in the same direction.

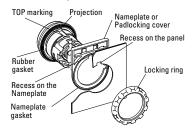

Note: The locking ring for emergency stop switches and meter is metallic. The meter can't mount the nameplate or podlocking cover.

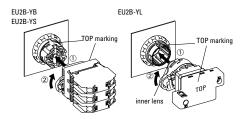

### Installing the contact unit and lamp unit

To install the contact unit, place the TOP marking on the operator and the TOP marking on the contact block adapter in the same direction, and then attach the contact unit to the operator. Then turn the locking lever to the right. Follow the same procedure when installing the lamp unit.

When installing the lamp unit, check that the inner lens is not loose.

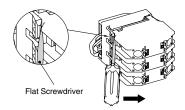

The contact block adapters for emergency stop switches cannot be used for the pushbutton, selector and key selector switches.

#### **Removing the Contact Block**

To remove the contact block, insert a flat screwdriver under the latch of the contact block adaptor and disengage the latch as shown in the figure below.

#### **Installing the Contact block**

When installing the contact block after maintenance or wiring, make sure that the contact configuration is correct. Installing the contact block in the incorrect position or incomplete installation may cause malfunction of the switch.

Remove the contact block from the operator before installing the contact block to the contact block adaptor. Also make sure that the contact block is correctly installed to the contact block adaptor before attaching the operator. Do not install the contact block adaptor with the operator attached. Otherwise, malfunction may result.

#### **Accessories**

#### **Padlock Cover**

The following padlocks and hasps can be used:

(Padlock Size)	a	b	C
Flush/extended pushbutton/key selector switch	ø3.5 to 7.0 mm	15 mm min.	70 mm max.
Emergency Stop Switch	ø5.5 to 7.0 mm	_	_

#### **Recommended Hasp**

Manufacturer	Part No.
Panduit	PSL-1, PSL-1A, PSL-1.5, PSL-1.5A, PSL-HD1
Master Lock	420, 421

Padlock and hasp are available in various shapes and sizes. Make sure that they do not interfere with the control units. Note: Not supplied by IDEC.

Keep the total weight of padlock and hasp under 1500g max, otherwise the switch may malfunction or result in failure. No vibration should be applied when padlock or hasp are installed. When padlock or hasp are disfigured, stop usage immediately.

Ensure that no shock or electric sparks are generated.

When using the plate lock padlock cover with the extended pushbutton, the switch contact may turn on/off when the cover is being installed. Ensure to provide functional safety measure to prevent unexpected startup.

When using the padlock cover on the safety-related part of the control system, observe safety standards and regulations of the relevant country or region. Also be sure to perform risk assessment before operation.

#### Installing EU9Z-PC Padlock Cover

(Flush/extended pushbtton/key selector switch)

EU9Z-PC can be installed in the following two ways.

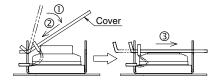

Remove the cover in the reverse step of installing the cover. Do not install or remove the cover forcefully, or it will cause failure.

[Installation A]

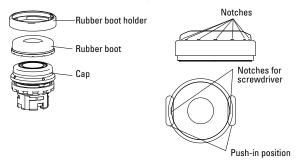

## [Installation B]

This method is effective when the neighboring control unit interferes when installing in method

#### **Installing EU9Z-DB Rubber Boots**

To install the rubber boot on flush and extended pushbuttons, place the rubber boot on the cap and push the rubber boot holder straight. The notches around the rubber boot must show evenly.

Push the rubber boot holder further around on the two notches on the holder so that the holder fits the button completely

Make sure that the rubber boot and rubber boot holder are installed straight.

On Nameplate Types, the EU2B and the rubber boot holder must be aligned so that when installed, the anti-rotation projection on the EU2B comes to the center of the groove on the holder.

Make sure that the rubber boot is installed completely, otherwise Type 4X degree of protection cannot be obtained. Water droplets might enter the rubber boot, but no water will enter the control box.

To remove the rubber boot from the flush and extended pushbuttons, gently insert the slotted screwdriver (0.5t x 4w or below) inside a notch on the rubber boot holder and tilt to the direction shown by the arrow ①. To prevent damage, do not apply excessive force to the EU2B when removing the rubber boot.

#### **Maintenance and Inspection**

EU2B switches should be installed in an appropriate control box.

#### Maintenance and Inspection Method

Perform daily or periodical maintenance and inspection for items such as damage and temperature rise of the EU2B switches listed in the Maintenance and Inspection table below.

#### **Maintenance and Inspection**

Inspection Items	Inspection Method	Inspections	Measures
Enclosure base	Visual	No rusting No damages	Cleaning Rust-resistant treat- ment
Tightening bolt, screws	Visual, tactile	No loosening No rusting	Tightening Cleaning
Packings	Visual	No cracks No apparent deforma- tion	Replacement
Connecting parts	Visual, tactile	No loosening of screws No dirt on insulation materials	Tightening Cleaning
Temperature rise	Thermometer, tactile	Surface temperature 80°C max.	Investigate the cause

#### Disposal

Observe laws and regulations set by each country concerning refuse disposal.

#### **Safety Precautions**

Use EU2B switches that are applicable for use in hazardous areas (potentially explosive atmosphere where explosive gas or vapor may exist), otherwise explosion or fire hazard may result.

- EU2B switches can be installed only in zones 1 and 2. Do not use in zone 0.
- Turn power off to the EU2B switches before installation, removal, wiring, or maintenance, otherwise explosion, fire hazard, or electric shock may result.
- Do not disassemble, repair, or modify, otherwise damage or accident may result.
- Do not use damaged EU2B switches, otherwise damage or accident may result.
- When connecting external devices, make sure that each cable is connected to the correct terminal, otherwise electric shock, fire hazard, or explosion may result.
- Use wires of a proper size to meet voltage and current requirements. Incorrect wiring may
  cause abnormal temperature rise and lead to fire hazard and explosion.
- Connect the grounding terminal to a proper ground, otherwise electric shock, fire hazard, or explosion may result.
- Operate the EU2B switches at the rated current and voltage specified in this catalog, otherwise short-circuiting, fire hazard, or explosion may result.
- Stop operation immediately if abnormal operation occurs. Otherwise, a secondary accident may occur.
