WIMA MP 3-X2

Metallized Paper (MP) RFI-Capacitors Class X2 PCM 10 mm to 27.5 mm

Special Features

- Particularly high reliability against active and passive flammability
- Excellent self-healing as well as high voltage strength
- High degree of interference suppression due to good attenuation and low ESR
- For temperatures up to +110°C
- According to RoHS 2002/95/EC

Typical Applications

Class X2 RFI applications to meet EMC regulations

- Capacitors connected to the mains between phase and neutral or phase and phase conductors
- Installation category II in accordance with IEC 60664, pulse peak voltage ≤ 2.5 kV

Construction

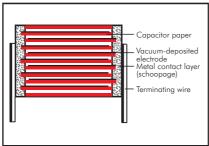

Dielectric:

Paper, epoxy resin impregnated

Capacitor electrodes:

Vacuum-deposited

Internal construction:

Encapsulation:

Self-extinguishing epoxy resin, UL 94 V-0, metal foil

Terminations:

Tinned wire.

Marking:

Marking: Black on Silver.

Electrical Data

Capacitance range:

1000 pF to 1.0 μ F (E12-values on request) **Rated voltages:**

250 VAC, 275 VAC

Capacitance tolerances:

±20%

Operating temperature range:

-40° C to +110° C

Climatic test category:

40/110/56/C in accordance with IEC **Insulation resistance** at +20° C: $C \le 0.33~\mu\text{F}$: $\ge 12 \times 10^3~\text{M}\Omega$ $C > 0.33~\mu\text{F}$: $\ge 4000~\text{sec}$ (M $\Omega \times \mu\text{F}$) Measuring voltage: 100~V/1 min.

Dissipation factors:

tan $\delta \le 13 \times 10^{-3}$ at 1 kHz and +20° C

Test specifications:

In accordance with DIN EN 132400

Approvals:

Approvais:					
Country	Authority	Specification	Symbol	Approval-No. 250 VAC	Approval-No. 275 VAC
Germany	VDE	DIN EN 132400 IEC 60384-14/2	EN 132 400	89749	89749
USA	UL	UL 1283	<i>7</i> .	E 100438	E 100438
Canada	CSA	C 22.2 No. 8	®	LR 93312-1	LR 93312-1

Mounting Recommendation

To minimize or avoid shock and/or vibration stresses to terminating wires and solder connections we recommend to fix voluminous resin-potted MP capacitors as from e.g. PCM 22.5 mm in an appropriate way since for constructional reasons they do not sit tight on the board.

Maximum pulse rise time:

Capacitance pF/µF	Pulse rise time V/µsec max. operation
1000 1500	1000
2200 4700 6800 0.022 0.033 0.047	450 300 200
0.068 1.0	100

for pulses equal to the rated voltage, $\rm U_{pp}\,{=}\,390~V$

Test voltage: 2700 VDC, 2 sec. Reliability:

Operational life > 300 000 hours Failure rate < 1 fit (0.5 x U_r and 40° C)

Packing

Available taped and reeled up to and including PCM 22.5 mm.

Detailed taping information and graphs at the end of the catalogue.

For further details and graphs please refer to Technical Information.

WIMA MP 3-X2

^{*} f = 50/60 Hz

Upon request with long leads 35-2 mm max.

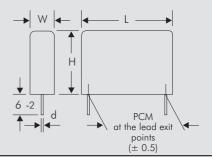

* On ordering please state the required <u>PCM</u> (lead spacing). If not specified, smaller PCM will be booked.

Dims. in mm.

Taped version see page 100.

Impedance change with frequency (general guide)

d = 0.7 Ø if PCM 10 d = 0.8 Ø if PCM $\geqslant 15$

Rights reserved to amend design data without prior notification.

^{**} PCM = Printed circuit module = lead spacing

Recommendation for Processing and Application of **Through-Hole Capacitors**

Soldering Process

A preheating of through-hole WIMA capacitors is allowed for temperatures $T_{\text{max}} < 100 \,^{\circ} \text{C}.$

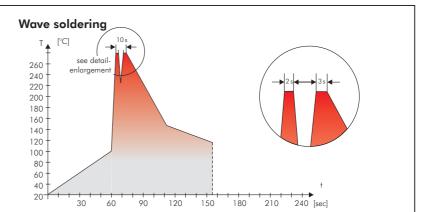

In practice a preheating duration of t < 5 min. has been proven to be best.

Single wave soldering

Soldering bath temperature: T < 260° C Immersion time: t < 5 sec

Double wave soldring

Soldering bath temperature: $T < 260^{\circ} C$ Immersion time: 2xt < 3sec

Temperature/time graph for the maximum permissible solder bath temperature for the wave soldering of through-hole WIMA capacitors

·WIMA Quality and Environmental Philosophy·

ISO 9001:2000 Certification

ISO 9001:2000 is an international basic standard of quality assurance systems for all branches of industry. The approval according to ISO 9001:2000 of our factories by the VDE inspectorate certifies that organisation, equipment and monitoring of quality assurance in our factories correspond to internationally recognized standards.

WIMA WPCS

The WIMA Process Control System (WPCS) is a quality surveillance and optimization system developed by WIMA. WPCS is a major part of the quality-oriented WIMA production. Points of application of WPCS during production process:

- incoming material inspection
- metallization
- film inspection
- schoopage
- pre-healing
- lead attachment
- cast resin preparation/ encapsulation
- 100% final inspection
- AQL check

WIMA Environmental Policy

All WIMA capacitors, irrespective of whether through-hole devices or SMD, are made of environmentally friendly materials. Neither during manufacture nor in the product itself any toxic substances are used, e.g.

- Lead
- PBB/PBDE
- PCB
- Arsenic
- CFC

- Hydrocarbon chloride
- Cadmium

- Chromium 6+
- Mercury

We merely use pure, recyclable materials for packing our components, such as:

- carton
- cardboard
- adhesive tape made of paper
- polystyrene

We almost completely refrain from using packing materials such as:

- foamed polystyrene (Styropor®)
- adhesive tapes made of plastic
- metal clips

RoHS Compliance

According to the RoHS Directive 2002/95/EC certain hazardous substances like e.g. lead, cadmium, mercury must not be used any longer in electronic equipment as of July 1st, 2006. For the sake of the environment WIMA has refraind from using such substances since years already.

Tape for lead-free WIMA capacitors

ISO 14001:2005

WIMA's environmental management has been established in accordance with the auidelines of ISO 14001. The certification is under preparation and is expected to be accomplished by June 2006.
