LPH175 Series

These cable ties are "outside serrated", presenting a smooth surface to the cable bundle and avoiding any problems with damage to the insulation, the width of the ties gives a broad contact area with the cable, again minimising the risk of damage. The PE/RPE ranges have the benefit of EDF (French Electricity Board) approval. The "Low Profile" design of the head allows for use in applications with restricted space. The RP ties are releasable and reusable allowing for the addition or removal of cables after installation.

Designed primarily for use within the electrical supply industry these ties are particularly useful in areas with limited space, e.g.cable bundling in shafts and are particularly suitable for outdoor use as they are manufactured from "UV" resistant polyamides.
