THICK FILM PASSIVE ELEMENT

GBR-181 Series

Characteristic

GBR-181 series resistors are made in a thick film technology, on ceramic substrates (Al₂O₃ - 96%). Thick film resistors are characterized by a higher stability, and lower noises than a typical carbon resistors. The whole of resistor encapsulated with epoxy resin by is fluidization GBR-181 process. series elements are used both for general, and professional applications. Other values of resistance, and tolerance (up to 0,1%) are available on request.
