

# RCY CONNECTOR

Disconnectable Crimp style Wire-to-wire connectors

The RCY connector is a compact, 2.5mm pitch wire-to-wire connector for use with a variety of circuits, from signal circuits to power supply circuits, in electrical equipment which is becoming more and more compact. The employment of a free spring contact method ensures stable contact performance, and superb working efficiency of insertion and removal.

### Features —

## • Use of a free spring contact for superb creep characteristics

The contact section features a free spring contact construction, which effectively minimizes stress (creep) caused by repeated insertion and removal at high temperatures. Connector insertion and removal is also smooth, ensuring stable connection performance.

### Compact design

The RCY connector is designed to be compact. When mated, its overall length is just 23.3mm and its thickness is 4.0mm

### Housing lock

Because a lock is provided inside the housing, external force is not applied to the lock.
