

# LV.A

Levelling elements

## technical informations

### Base

Glass-fibre reinforced polyamide based (PA) technopolymer. Resistant to solvents, oils, greases and other chemical agents.

### Colour

Black, matte finish.

### Articulated stem

Threaded zinc-plated steel and regulation hexagon.

### No-slip disk

NBR synthetic rubber, hardness 70 Shore A.

- LV.A: without no-slip disk.

- LV.A-AS: with no-slip disk, supplied assembled.

*Accessories on request*

Zinc-plated steel nut to be ordered separately (see Nuts [NT](#)).

### Features and applications

The light knurling under the lower lip of the levelling element provides excellent stability and grip when using the levelling element without no-slip disk even on surfaces that are not perfectly flat.  
The particular configuration of bases and no-slip disks assures a strong assembly, preventing separation in case of strong impact or adhesion with the floor (see [No-slip disks](#)).

### Order information

To order bases and stems separately, see the [table of the possible combinations Bases/Stems](#).  
The levelling element is supplied unassembled to make carriage and storage easier; the components are in separate packing: less volume taken and better protection from scratches and dirt.
