

Flat Cool Pipes / MHP Series

By using a Ultra flat Heat pipe (also known as Coolpipe) it may be possible to eliminate the need for a costly fan and heat sink, with the additional benefits of reducing power consumption, noise output, product thickness and cost. The flat heat pipes can directly remove heat from the source and be transferred direct to the chassis or to an external heat sink. It also negates the requirement for ventilation holes and thereby reduce ingress of dust (no air filters required) and static. The thickness of the Coolpipes ranges from 1.2mm to 2.5mm, with lengths from 60mm~500mm. They can achieve up to 270W of heat transfer.

Features:

- Working Fluid: Acetone.**
- Thermal Performance: Up to 450W.**
- Ultra Slim Flat Heatpipe (Thickness 1.2 ~ 4.0mm).**
- Light Weight, Great Uniformity.**
- Custom Size Available.**
- Life time upto 16 years.**
