## HUBER+SUHNER® SUCOTEST 18 ASSEMBLY

Part no.:
ST-18/Nm/Nm/48
Order no.:
84003372

## Electrical specifications

Impedance
Operating frequency
Velocity of propagation
Capacitance
Time delay
Insulation resistance
Dielectric withstand voltage
Screening effectiveness

50 Ohms
18 GHz
77\%
$87 \mathrm{pF} / \mathrm{m}(26.5 \mathrm{pF} / \mathrm{ft})$
$4.3 \mathrm{~ns} / \mathrm{m}$ ( $1.31 \mathrm{~ns} / \mathrm{ft}$ )
$>5 \times 10^{3} \mathrm{M} \Omega$
21500 V rms
$>90 \mathrm{~dB}$

## General specifications

Assembly length
Cable diameter
Temperature range
Preferred bending radius
Connector retention force
Recommended mating torque
Connector interface
Weight

1219 mm (48 in.)
$4.6 \mathrm{~mm}(0.181 \mathrm{in}$.)
$-55^{\circ} \mathrm{C}$ to $+105^{\circ} \mathrm{C}$
100 mm (4.0 in.)
$>200 \mathrm{~N}$
$0.68 \mathrm{Nm} . . .1 .13 \mathrm{Nm}$ (6.0 ... 10.0 in.lbs) MIL-STD-348A/304 122 gram

## SUCOTEST ${ }^{\text {m }}$ be precise.

## Materials and finishes

Cable jacket
Cable dielectric
Taper sleeves Marking sleeve Connector contacts Connector insulation
Connector body
Connector nut
Gasket

FEP, blue
LDPTFE
Santoprene / black
Crosslinked polyolefin/white
Beryllium-copper, gold plated PTFE
Stainless steel, passivated Stainless steel, passivated Silicon rubber

## Dimension

| Max. cw power at $25^{\circ} \mathrm{C}$, sea level |  | > 391 | > 277 | > 225 | > 160 | > 131 |
| Max. insertion loss vs. shaking | (dB) | < 0.03 | < 0.03 | $<0.03$ | $<0.03$ | < 0.03 |
| Max. insertion loss vs. bending | (dB) | < 0.03 | < 0.04 | < 0.04 | < 0.05 | < 0.05 |
| Max. insertion loss vs. torsion | (dB) | < 0.03 | < 0.04 | < 0.04 | < 0.05 | < 0.05 |

## Care and handling instructions for HUBER + SUHNER microwave cables

HUBER + SUHNER microwave cable assemblies of all types offer a long service life providing they are treated with the appropriate care and attention. Microwave cable assemblies are high precision system components and require proper handling in order to ensure that measuring performance values are maintained.

To achieve the maximum measuring performance the following guidelines should be followed:

1. Assemblies should remain in their original packaging for delivery and storage. Storage temperature should be between $-50^{\circ} \mathrm{C}$ and $+80^{\circ} \mathrm{C}$ and the relative humidity should not exceed $85 \%$.
2. Carefully unpack assemblies before measurement. Avoid kinking cables when straightening from a coil or reel.
3. Ensure that the surroundings are clean and free of dust, dirt and any other particles that could enter unsealed connector interfaces.
4. Use protective caps to prevent contamination whenever connectors are unmated.
5. Where interfaces are contaminated, particles can be removed with dry, oil-free compressed air. Please use eye-protection. Interfaces can be cleaned with dry cotton swabs. Do not use hard hand-tools or solvents. Do not blow into interfaces or use normal compressed-air.
6. Choose the measurement routing using the largest bend radii possible. Small bend radii may affect electrical performance. Exceeding the specified limits during the measurement process could cause a permanent degradation.
7. Avoid twisting microwave cable assemblies. Torsion of this type of assembly can alter the relative diameters of cable layers and affects the electrical characteristics. Exceeding the limit of $10^{\circ}$ per metre during measuring process could cause a permanent degradation.
8. Examine interfaces for damage and/or contamination before mating.
9. Discharge connectors before mating or ensure that they are connected to a suitable ground.
10. When mating connectors with a screwed interface always hold the connector bodies and turn only the coupling nut. This avoids twisting the cable and ensures minimum wear on the connector pins.
11. Do not exceed the torque specified.

The HUBER+SUHNER is certified according to ISO 9001 and ISO 14001.
