

ASMT-Mx6x

Moonstone™ ½W Power LED Light Source

AVAGO
TECHNOLOGIES

Data Sheet

Description

½W Power LED Light Source is a high performance energy efficient device which can handle high thermal and high driving current. The exposed pad design has excellent heat transfer from the package to the motherboard.

The Cool White Power LED is available in various color temperature ranging from 4000K to 10000K and Warm White Power LED ranging from 2600K to 4000K.

The low profile package design is suitable for a wide variety of applications especially where height is a constraint.

The package is compatible with reflow soldering. This will give more freedom and flexibility to the light source designer.

Applications

- Sign backlight
- Safety, exit and emergency sign lightings
- Specialty lighting such as task lighting and reading lights
- Retail display
- Commercial lighting
- Accent or marker lightings, strip or step lightings

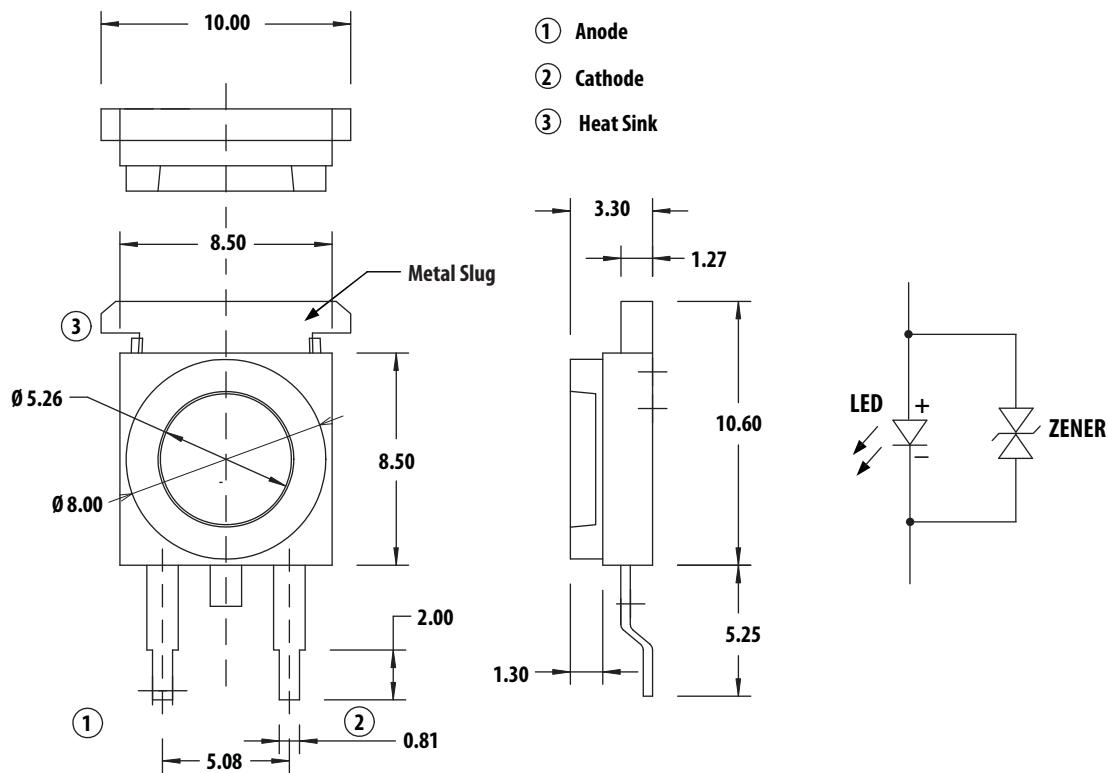

Features

- Available in Cool White and Warm White color
- Energy efficient
- Exposed pad for excellent heat transfer
- Suitable for reflow soldering process
- High current operation
- Long operation life
- Wide viewing angle
- Silicone encapsulation
- ESD HBM Class 3B, > 8000
- MSL 4 products
- High junction temperature of 145°C

Specifications

- InGaN Technology
- 3.3V, 150mA (typical)
- 110 viewing angle

Package Dimensions

Notes:

1. All dimensions are in millimeters.
2. Unless otherwise stated, the tolerance for dimension is $\pm 0.1\text{mm}$.

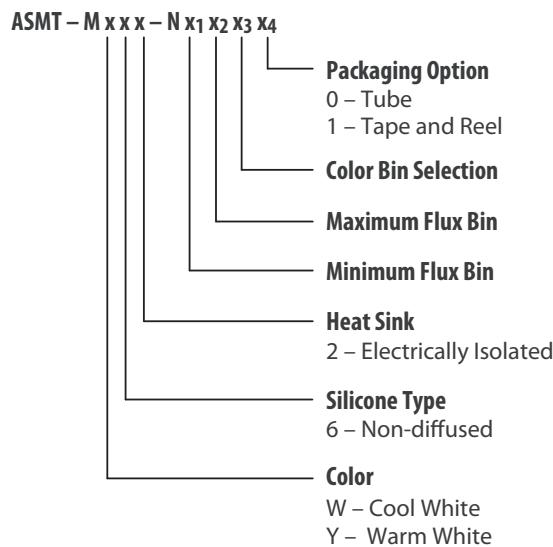

Device Selection Guide ($T_j = 25^\circ\text{C}$)

| Part Number | Color | Luminous Flux, $\Phi_V^{[1,2]}$ (lm) | | | Test Current (mA) | Dice Technology | Electrically Isolated Metal Slug |
|-----------------|------------|--------------------------------------|------|------|----------------------|--------------------|--|
| | | Min. | Typ. | Max. | | | |
| ASMT-MW62-NGJ00 | Cool White | 25.5 | 41.0 | 56.0 | 150 | InGaN | Yes |
| ASMT-MW62-NHK00 | | 33.0 | 49.0 | 73.0 | 150 | InGaN | Yes |
| ASMT-MY62-NGJ00 | Warm White | 25.5 | 38.0 | 56.0 | 150 | InGaN | Yes |

Notes:

1. Φ_V is the total luminous flux output as measured with an integrating sphere at 25ms mono pulse condition.
2. Flux tolerance is $\pm 10\%$

Part Numbering System

Absolute Maximum Ratings at T_A = 25°C

| Parameter | ASMT-Mx6x / ASMT-MxHx | Units |
|-------------------------------------|-----------------------|-------|
| DC Forward Current [1] | 150 | mA |
| Peak Pulsing Current [2] | 300 | mA |
| Power Dissipation | 555 | mW |
| LED Junction Temperature | 145 | °C |
| Operating Ambient Temperature Range | -40 to +120 | °C |
| Storage Temperature Range | -40 to +120 | °C |

Notes:

1. DC forward current – derate linearly based on Figure 7.
2. Pulse condition duty factor = 10%, Frequency = 1kHz

Optical Characteristics (T_A = 25°C)

| Part Number | Color | Correlated Color Temperature, CCT (Kelvin) | | Viewing Angle 20½ [1] (Degrees) | Luminous Efficiency (lm/W) |
|-----------------|------------|---|-------|------------------------------------|-------------------------------|
| | | Min | Max | | |
| ASMT-MW62-NGJ00 | Cool White | 4000 | 10000 | 110 | 83 |
| ASMT-MW62-NHK00 | | 4000 | 10000 | 110 | 99 |
| ASMT-MY62-NGJ00 | Warm White | 2600 | 4000 | 110 | 77 |

Notes:

1. θ½ is the off-axis angle where the luminous intensity is ½ the peak intensity.

Electrical Characteristic (T_A = 25°C)

| Dice Type | Forward Voltage V _F (Volts) @ I _F = 150mA | | Reverse Voltage V _R (Volts) | Thermal Resistance R _{θj-ms} (°C/W)[1] |
|-----------|--|------|---|--|
| | Typ. | Max. | | |
| InGaN | 3.3 | 3.7 | 5 | 27 |

Note:

1. R_{θj-ms} is Thermal Resistance from LED junction to metal slug.

Flux Bin Limit^[1] (For reference only) [X₁ X₂]

| Flux (Im) at 150mA | | |
|--------------------|------|-----|
| Bin | Min | Max |
| G | 25.5 | 33 |
| H | 33 | 43 |
| J | 43 | 56 |
| K | 56 | 73 |
| L | 73 | 95 |

Tolerance for each bin limits is $\pm 10\%$

Color bin selection [x₃]

Individual reel or tube will contain LEDs from one color bin only.

Cool White

| Selection | Bin |
|------------------|--------------------|
| 0 | Full Distribution |
| A | A only |
| B | B only |
| C | C only |
| D | D only |
| E | E only |
| F | F only |
| G | G only |
| H | H only |
| L | A and G only |
| M | B and H only |

Handling Precaution

The encapsulation material of the product is made of silicone for better reliability of the product. As silicone is a soft material, please do not press on the silicone or poke a sharp object onto the silicone. These might damage the product and cause premature failure. During assembly or handling, the unit should be held on the body only. Please refer to Avago Application Note AN 5288 for detail information.

Moisture Sensitivity

This product is qualified as Moisture Sensitive Level 4 per Jedecl J-STD-020. Precautions when handling this moisture sensitive product is important to ensure the reliability of the product. Do refer to Avago Application Note AN5305 Handling of Moisture Sensitive Surface Mount Devices for details.

A. Storage before use

- Unopen moisture barrier bag (MBB) can be stored at <40°C/90%RH for 12 months. If the actual shelf life has exceeded 12 months and the humidity indicator card (HIC) indicates that baking is not required, then it is safe to reflow the LEDs per the original MSL rating.
- It is not recommended to open the MBB prior to assembly (e.g. for IQC).

B. Control after opening the MBB

- The humidity indicator card (HIC) shall be read immediately upon opening of MBB.
- The LEDs must be kept at <30°C/60%RH at all time and all high temperature related process including soldering, curing or rework need to be completed within 72 hours.

C. Control for unfinished reel

- For any unused LEDs, they need to be stored in sealed MBB with desiccant or desiccator at <5%RH.

D. Control of assembly boards

- If the PCB soldered with the LEDs is to be subjected to other high temperature processes, the PCB need to be stored in sealed MBB with desiccant or desiccator at <5%RH to ensure no LEDs have exceeded their floor life of 72 hours.

E. Baking is required if

- HIC "10%" indicator is not blue and "5%" indicator is pink.
- The LEDs are exposed to condition of >30°C/60% RH at any time.
- The LEDs floor life exceeded 72hrs.

Recommended baking condition: 60±5°C for 20hrs.
