

PTFE INSULATED EQUIPMENT WIRE TO BS 3G 210 UNSCREENED TYPE A, NA, B, NB, C and NC

PRODUCT DESCRIPTION

PTFE insulated conductors are widely used for internal and external connectors for electronic equipment and instrumentation or environments that demand high levels of thermal, chemical, electrical or mechanical protection.

PTFE is highly resistant to oils, lubricants, fuels and is non flammable whilst being very flexible.

If required for termination, PTFE cables can be surface treated or 'etched'.

PRODUCT CHARACTERISTICS

Conductor : Silver (Type A, B or C) or Nickel (Type NA, NB or NC) plated annealed copper wire

Insulation PTFE

Available in a wide range of ROHS compliant solid and bi-colours
