Power Forward

Designs change—and so should your DC power supply. Meet the E36100, engineered by Keysight to power your designs safely and quietly during manual tests or automated sequences. From every angle—size, display, and I/O—the E36100 will impress you. Add one to your bench and power forward.

From every angle–size, display, and I/O–the E36100 will impress you.

Put an E36100 Series DC power supply on your bench.

- Save space on your bench or in the rack with the compact, ¼-rack form factor.
- Set up the E36100 quickly and predictably through the alphanumeric OLED display and intuitive on-screen menu system.
- Easily see the front-panel readout, even from wide angles.

Control your E36100 Series DC power supply remotely.

- Connect easily with full LXI LAN and USB (TMC488).
- Accelerate automation of complex or repetitive testing via SCPI or IVI programming.
- Control the power supplies easily via the built-in Web interface, BenchVue, or Keysight IO Libraries.
- Enhance system throughput and improve test quality with highspeed output control and fast command processing.

Power your DUT accurately and safely.

- Characterize low-power devices over wide ranges using low-range current readback.
- Protect your device under test (DUT) with overvoltage and overcurrent detection.
- Power your DUT with confidence through excellent accuracy in programming and readback.

ARRANTY

www.keysight.com/find/ThreeYearWarranty

Keysight's commitment to superior product quality and lower total cost of ownership. The only test and measurement company with three-year warranty standard on all instruments, worldwide.

Keysight Assurance Plans

www.keysight.com/find/AssurancePlans

Up to five years of protection and no budgetary surprises to ensure your instruments are operating to specification so you can rely on accurate measurements.
