Intelligent Digital Multimeter TENMA™

Description

The multimeter is an intelligent digital one, a precise instrument with a resolution of 80,000 counts and up-to-date automatic computer calibrating function. High resolution A/D converter and micro-controller data processing technique is adopted in the meter, featured with intelligence, high precision and multi-functions. The meter can be widely used in laboratory field service, domestic and other applications. All the functions and ranges have full overload protection. In addition to the conventional measuring functions, it is equipped with a RS232C standard serial port for easy connection with computer to realize macro recording and monitoring and capture of transient dynamic data, displaying change of waveform during the measurement providing data and evidence to engineering technicians for scientific research. This is also a highly applied digital multimeter of good performance with display backlight.
