**Flat Panel Connection Enclosure**

Hubbell’s netSELECT® FPTV connection enclosure delivers high-density connectivity and power in the wall. In-wall connections allow flat panel displays and interactive “smart” boards to sit flush without dangling cords. It quickly installs to studs or sheetrock without additional components or hardware.

The enclosure is designed to accommodate large bend radii associated with current cable types such as HDMI, DVI, RG6/UQ, and VGA. The base is constructed from 18ga. cold rolled steel, which provides toughness and meets requirements for high-rise residential and commercial construction. The white powder coat finish provides durability and an appearance that blends into the wall.

**APPLICATIONS**

- Interactive Whiteboards
- Flat Panel Displays
- Home Theater
- Information Displays
- Small Wireless APs
- Multimedia Workstations
