

Contacts

The Cannon DL Crimp and Buss contacts are available in addition to the factory installed Square Post/PCB mount version contacts. Crimp contacts are available loose or reeled, where as Buss contacts are available loose only.

The **Buss contacts** make the DL series capable of providing higher than 5 amps per line. The Buss contacts are pairs of contact lines which increase the amperage capability in increments of 10 amps up to 60 amps. The contacts have solder holes at the tail section for soldering #30-#18 AWG. The tail is also designed to accommodate a 1/8" crimp lug for wire sizes larger than #18.

The **Crimp contacts** are available in two plating types. The 20μ inch gold hermaphroditic version which is the economical choice for applications requiring over 100 milliamps to 5 amps. And the **50μ inch gold BUMP to FLAT** version which offers the most versatile range of application requirements from micro-amps to 5 amps.

The **BUMP to FLAT** version was developed specifically to handle "dry circuit" requirements where the signal amperage is not enough to ensure a clean contact point. The **50μ inch gold BUMP to FLAT** version is mandatory for applications with signals below 100 milliamps. The Bump contact is installed in the Plug and the Flat contact is installed in the Receptacle. This combination increases the contact force and

ensures that the wiping point becomes the current carrying point after mating. The **50μ inch gold BUMP to FLAT** version has become the standard for all modern applications where power and low voltage signals are combined into one connector.

Materials and Finishes

Description	Material	Finish
Crimp Contact*	Copper Alloy	Gold over nickel or Selective gold/tin lead over nickel
Buss Contact	Copper Alloy	Gold over nickel

*Order crimp contacts separately. See pages 52-53.

Contacts

Buss Contacts

6 Pair/3Pair/1 Pair

- Designed for power distribution of more than 5 amps.
- Accommodates #30-#18 AWG in hole \varnothing 1,29-1,14 (.051-.045) for wire soldering.
- Accommodates 1/8" crimp lugs for larger wire sizes.

Material: Copper Alloy

Finish: 20 μ inch in mating area/
gold flash on balance (terminating end)

1 Pair

Buss Contact

Description	Part Number
1 Pair	030-7380-001
2 Pair	030-7380-002
3 Pair	030-7380-003
4 Pair	030-7380-004
5 Pair	030-7380-005
6 Pair	030-7380-006

Note: For more information on tools and assembly, see pages 54-59.

Wire Termination — Solder

Wire Termination — Crimp Lug

Contacts

Crimp Contacts — Loose

Loose

50µ inch gold contacts:

- Recommended for all applications.
- Offer the broadest amperage range.
- Mandatory for low current applications (less than 100 milliamps).

Material:	Copper Alloy
Finish:	Gold over nickel
Extraction Tool:	274-7029-007
Insertion Tool:	None Required

Plug (Bump)

Receptacle (Flat)
