

Signal Tower KombiSIGN 70

This is how you can assemble your KombiSIGN 70 signal tower!

► STEP 1

Select the required optical or audible elements.

Many KombiSIGN highlights are also available (for details see page 37).

Audible Signal Elements

- Buzzer Element
- Siren Element
- Vocal Element

Optical Signal Elements

- (LED) Permanent Light
- LED Permanent Light ultrabright
- (LED) Flashing Light
- LED EVS Element
- LED Blinking Light
- LED Rotating Light

NEW

► STEP 2

Select the appropriate mounting option for your application.

► STEP 3

Select the correct terminal element for your mounting option.

Base Mounting

Terminal element for base mounting
Order no. **840 085 00**

Tube Mounting

Terminal element for tube mounting
Order no. **840 080 00**

► STEP 4

Where appropriate, select a base and the desired length (only for tube mounting).

Tube with clamp
Order no. **960 000 18**

Adaptor for single hole mounting
Order no. **960 000 25**

Base with integrated tube
Order no. **975 840 10**

Tube Ø 25 mm, all anodized
Order no.

- 100 mm long **975 845 10**
- 250 mm long **975 840 25**
- 400 mm long **975 840 40**
- 600 mm long **975 840 60**
- 800 mm long **975 840 80**
- 1000 mm long **975 840 03**

Base for Tube, plastic
Order no. **975 840 90**

Base for Tube, metal
Order no. **975 840 91**

Foldaway Base
Order no. **960 000 30**

Tube Ø 25 mm, plastic, only for Foldaway Base, 45 mm long
Order no. **960 000 31**

► STEP 5

Where appropriate, select the bracket and the contact box.

Contact box for cable exit at side
Order no. **975 840 01**

Bracket for base mounting
Order no. **960 000 02**

Contact box for cable exit at side
Order no. **975 840 01**

Contact box with magnetic base and cable exit at side
Order no. **975 840 04**

Bracket for 1-sided mounting
Order no. **975 840 85**

Bracket for 2-sided mounting
Order no. **975 840 86**

Bracket for base mounting with concealed cable entry
Order no. **960 000 14**

Bracket for tube mounting
Order no. **960 000 01**

The Highlights for KombiSIGN 70

NEW

WIN – Wireless Information Network

- Economical wireless-based Machine Data Collection system (MDC system)
- Central monitoring of a wide range of different machines via PC

See page 43

NEW

KombiSIGN reflect

- Simple monitoring of signal towers out of view
- Signal tower "reflection" to a central location

See page 44

GSM Transmitter Element

- Malfunction signalled by signal tower is transmitted via SMS or call to a mobile phone
- Activation without the need for programming
- No additional power supply needed

See page 45

AS-Interface Element

- LEDs indicate current status
- 31 or 62 addresses
- Available with standard or A/B technology

See page 46

NEW

LED Permanent Light Element ultrabright

- Up to 20 times brighter than conventional LED elements
- Maximum brightness via intelligent LED control

See page 47

LED Flashing Light Element

- Extremely long life duration up to 50,000 hrs
- Low current consumption
- Shock-proof and vibration resistant

See page 38

LED EVS Element

- Attention-grabbing flickering light
- Extremely powerful signal effect
- Random sequence of light signals prevents acclimatisation effect

See page 48

Vocal Element

- Plays customer-specific audio files in mp3 format (sounds, alarms, music or spoken text)
- Easy programming via USB interface
- Up to 60 minutes replay capacity

See page 49

NEW

Siren Element with self-adjusting sound output

- Sound output is automatically adjusted to the background noise level
- Warning tone can be heard without being irritatingly loud

See page 50

Terminal Element with USB Interface

- Direct triggering of signal tower elements via USB Interface
- Easy activation

See page 51

Customer specific coloured coatings

- Signal towers in customer-specific colours – complete range of RAL colours available
- Meets the demands of an increasing design orientation

See page 52

Foldaway base

- Enables signal towers to be folded down completely, even when connected
- Vertical alignment of signal towers even on sloping surfaces

See page 53

NEW

“WIN system” is immediately ready for use: Fit the slaves in the existing signal towers and connect the master to the PC

- Economical wireless-based Machine Data Collection system (MDC system)
- Central monitoring of a wide range of different machines via PC
- Relevant machine information at a glance
- Reduction of reaction times, repair and maintenance requirements and costs
- No additional wiring as existing WERMA signal towers can be used
- Downtime analysis

With the supplied software, users can wirelessly monitor their machinery via PC

The software enables users to analyse productivity and increase the efficiency of their machines

⚠️ ADDITIONAL INFORMATION:

Signal tower "reflection"

WERMA Signaltechnik provides a simple solution for the remote wireless monitoring of machinery. The new "KombiSIGN reflect" kit can be integrated into existing signal towers which are already installed on your machines. KombiSIGN reflect "reflects" the status of the machine to a signal tower within your line of sight.

This enables you to wirelessly monitor machines situated at a greater distance and respond quickly to malfunctions. With KombiSIGN reflect, even machines which were not previously network-capable can now be remotely monitored.

Further information can be found in the chapter "Tech-Talk" on page 324.

⚠️ ADDITIONAL INFORMATION:

The KombiSIGN Signal Towers 70 and 71 with AS-Interface Element are capable of total communication: Through simple integration of an AS-Interface Element the actuators are connected to the networking system Actuator-Sensor-Interface – this considerably reduces complex wiring. The necessary power supply (supply via bus or external) can be selected with a switch. This element is mounted as the first tier of the individual signal tower directly on top of the terminal element. (Further Information see page 319).

LED Permanent Light Element ultrabright for KombiSIGN 70

- Up to 20 times brighter than conventional LED elements
- Extremely good visibility – even in direct sunlight
- Life duration up to 50,000 hrs
- Maximum brightness via intelligent LED control
- Low current consumption and maintenance-free
- Shock-proof and vibration-resistant

Life duration up to 50,000 hrs

⚠️ ADDITIONAL INFORMATION:

Sophisticated triggering

Thanks to its sophisticated triggering, the innovative LED element "ultrabright" is up to 20 times brighter than conventional LED elements – making it almost certainly the brightest permanent light that the world of signalling technology currently has to offer.

Furthermore, the intelligent electronics ensure that the LEDs operate at maximum brightness, depending on the ambient and operating temperatures. The "ultrabright" LED element is therefore always working at its optimum, and the energy-saving LED technology ensures that power consumption is kept to a minimum.

Further informationen can be found in the chapter "Tech-Talk" beginning on page 325.

Patent pending

Integrated into the KombiSIGN Signal Towers, the new EVS LED Element generates a highly attention-grabbing signal

The way in which the brain processes visual stimuli formed the basis for the development of the new EVS technology

- Attention-grabbing flickering light
- Developed on a neurobiological basis
- Extremely powerful signal effect
- Random sequence of light signals prevents acclimatisation effect
- For signalling extremely hazardous situations and the need for immediate action

EVS – Attention-grabbing light effect on neurobiological basis

The flickering of neon lamps and comparable light effects are highly effective at attracting our attention. The neurobiological basis of this phenomenon is explained by a university scientist as follows: Light signals are processed in the human brain, not directly in the eye.

In order to be consciously registered there, incoming stimuli first have to pass through a form of filter. This filter has a "protective" function. During sleep it reduces disturbing stimuli to a minimum and assists in "overlooking" regular or continuous signals.

EVS – Flickering light without acclimatisation effect

On the basis of this understanding, WERMA's R+D department set out to find a flickering light with a high degree of effectivity in attracting attention. In a multistage laboratory experiment 20 test candidates were asked to judge a series of different light signals and to determine the most eye-catching light. The result of the study was a stochastic flickering light with optimal attention-grabbing characteristics: EVS – Enhanced Visibility System! The light effect of this system is completely new and distinguishes it from all previous systems.

⚠️ ADDITIONAL INFORMATION:

Direct triggering via USB Interface

In many applications, it is necessary to indicate operating states or faults by means of an optical signal. A PLC or machine controller is not available in all areas; PCs are often also connected to control the machines. The optimal solution for this is the terminal element with USB interface for KombiSIGN 70, 71 and Kompakt 71.

This innovation in the field of signal towers is controlled directly from the PC and can therefore be put into operation easily and in an uncomplicated manner. Neither a separate power supply nor additional hardware is required because the terminal element with USB interface is based on a standard USB interface.
