

# PRODUCT SPECIFICATION

Brand	C.K
Product Range	Redline VDE Pliers
Catalogue number	341 & 39071
Date	31/01/2011

## Range Description

A range of VDE approved Professional Electricians Pliers and cutters

## Range Features

- Certified & approved by the world renowned VDE institute of Germany
- Each tool is tested to 10,000v for the complete assurance of safety when working on live equipment up to 1000v AC
- GS (Gerpruffe Sicherheit) safety marked
- Ergonomic dual compound handle offering the perfect balance of grip and comfort
- Induction hardened and precision ground cutting edges for the ultimate in performance

## Access Pliers

A development of combination pliers specially designed to give Electricians:

1. Better access in tight situations
2. Effectively grips the square nuts of gutter screws used on cable management systems and control boxes
3. Hold pins and nails vertically for easy driving

## Combicutters

The combicutter range was developed following extensive research with professional electricians, and contains combinations of the three following key features

1. Wire stripping notches – quick and easy to use without the risk of cable damage
2. Wire bending anvil – a totally unique feature that makes doubling back wire quick, reliable and damage free
3. Patress screw shear – a auto aligning shearing hole that allows damage free cutting of patress screws

The range consists of 3 combicutters, top of the range is the **combicutter3** which has all three features making the job easier; quicker and damage free

Combination Pliers

Access pliers

Combicutter3

The **combicutter2** features the patress screw shear but also has the benefit of wire stripping notches – idea for those who feel comfortable with wire bending but recognize the benefit of effortless and quick wire stripping

*Combicutter2*

The **combicutter1** simply features the patress screw shear and is for those who prefer traditional wire stripping and bending techniques

*Combicutter1*

*Combicutter3 counter display*

## Combicutter max range

Following further research it was found that a significant proportion of Electricians would prefer a slightly larger version of the combicutter.

In addition it was found that there was often a need to cut 4mm screws for electrical conduit installation

Two new 180mm versions were launched:

The combicutter3 max featuring stripping bending and shearing facilities with the added 4mm screw shear

The combicutter1 max has a full blade and feature both the 3.5 and 4mm patress screw shears

*Combicutter3 max*

*Combicutter1 max*

*Sidecutters*

*Side cutters with wire stripping notches*

*Heavy duty sidecutters*

*Wire stripping pliers*

*Snipe nose pliers*

*Bent nose pliers*

*Heavy duty cable cutters*

*Pliers and screwdriver sets*
