DIN 48 SIZE
DIGITAL TIMER

Possible to set and change the time with front digit switches easily during the power off.
${ }^{\text {c }} \mathrm{TN}_{\mathrm{us}} \mathrm{C} \in$ Furthermore single unit has a time range of 0.01 s to 9990 hrs !!

## FEATURES

1. Possible to set and change the time and the time range even when the power is off.
2. Selectable 8 different time ranges with front digit switches.
3. [QM4H-S Type]

It can select the mode with MODE switch.
T.D. MODE: Time delay 2C (2 Form C)

INST. MODE: Time delay 1C (1 Form C) Instantaneous 1C (1 Form C)
[QM4H-G Type]
Reset and stop signal input enable to external control.

## PRODUCT TYPES

| Product name | Time delay direction | Time range | Operating mode | Contact arrangement | Operating voltage | Part number |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| S Type QM4H digital timer | Addition | $0.01 \mathrm{~s} / 0.1 \mathrm{~s} / 1 \mathrm{~s} / 0.1 \mathrm{~min} /$ $1 \mathrm{~min} / 0.1 \mathrm{~h} / 1 \mathrm{~h} / 10 \mathrm{~h}$ (8 time ranges) | Power ON delay | T.D. mode: Time delay 2 C INST. mode: Time delay 1C and Instantaneous 1C (Use MODE switch on front) | 12 to 48 V AC/DC | QM4HS-U2C-48V |
|  |  |  |  |  | 100 to 240 V AC/DC | QM4HS-U2C-240V |
| G Type QM4H digital timer |  |  | Power ON delay (with reset and stop terminals) | Time delay 1C | 12 to 48 V AC/DC | QM4HG-U1C-48V |
|  |  |  |  |  | 100 to 240 V AC/DC | QM4HG-U1C-240V |

Note: Time delay directional subtraction types are also available by order

## PART NAMES

Protective construction:
QM4H: IP40
with cover AQM4801: IP50
with cover AQM4803: IP64

TIME RANGE SETTINGS

| Time range switch |  | - <br> 0. <br> 0.1 <br> + <br> +0 | -S <br> S <br> $+\square$ |  |  |  | -7 <br> H <br> $+\square$ | - <br> 10 <br>  <br> +0 <br> +0 0 |

## OPERATION MODE

- QM4H-S Type

1) T.D. mode

2) INST. mode

- QM4H-G Type

* Set the reset inputs (1) to (3) and stop inputs (1) to (4) to 20 ms or higher.
* When shorting a signal, please set the inter-terminal resistance to $1 \mathrm{k} \Omega$ or less, and the inter-terminal residual voltage to 2 V or less. When releasing, please set the inter-terminal resistance to $100 \mathrm{k} \Omega$ or greater.

## PRECAUTIONS IN USING THE QM4H

1. Avoid locations subject to flammable or corrosive gases, excessive dust, oil, vibrations, or excessive shocks.
2. Since the main-unit is made of polycarbonate resin, avoid contact with or use in environments containing methyl alcohol, benzene, thinners, and other organic solvents; and ammonia, caustic sodas, and other alkaline substances.
3. Power supply superimposed surge protector
Although a surge protector will withstand standard-waveform voltage with the values in the next table, anything above this will destroy the internal circuit. You
should therefore use a surge absorber.

| 12 to $48 \mathrm{~V} \mathrm{AC/DC}$ | 100 to $240 \mathrm{~V} \mathrm{AC/DC}$ |
| :---: | :---: |
| $1,000 \mathrm{~V}$ | $6,000 \mathrm{~V}$ |

4. In order to maintain the characteristics, do not remove the timer case.
5. When installing the panel, use the supplied AQM4812 main-unit mounting frame. Note that the AT8-DA4 is also available for sale separately. 6. If you change the operating voltage, be sure not to allow leak current into the timer.
6. Avoid leaving the unit powered continuously. Leaving the unit powered up with output set to ON continuously for a long period of time (about 1 month or more) will wear out the electronic components. If you will be keeping it powered continuously, combine with a relay to create the circuit shown below:

[^0]:    Notes: 1. Unspecified measuring conditions are rated operating voltage (in case of DC type, ripple rate of $5 \%$ or less), ambient temp. $20^{\circ} \mathrm{C} 68^{\circ} \mathrm{F}$, and stop time 1 second.
    2. Reset start applies to QM4H-G type
    3. Excluding switches
    4. Note that if the QM4H-G type is set to zero " 0 " and a STOP signal is input, output will begin when the power is turned on.
