### **FM SUPER HETERODYNE RECEIVER**

#### **Features**

- FSK Radio Receiver
- CMOS / TTL Output
- Stable Operating Frequency
- 5Vdc Operating Voltage
- Low Power Consumption
- Wide Operating temperature

#### **Applications**

- Car Security Systems
- Automation Systems
- Remote Gate Controls
- Remote Sensing
- Data Capture
- Sensor Reporting

#### **Description**

The Quasar UK FM-RX1 Super Heterodyne receiver module provides a complete radio receiver which can be used to receive undecoded data from the QuasarUK QFM-TX1 transmitter module.

The receiver incorporates an entire Phase-Locked Loop (PLL) ensuring precise local oscillator generation.

The module is very simple to operate and offers low power consumption allowing for extended battery life without the need to power down the module.

Data can be fed directly into a microprocessor or decoding device, thus keeping the component count down and ensuring a low hardware cost.

All receivers are compatible, producing a CMOS/TTL output, and only require connections to power and antenna.
