Hardened Media Converter Switches, 10-Mbps
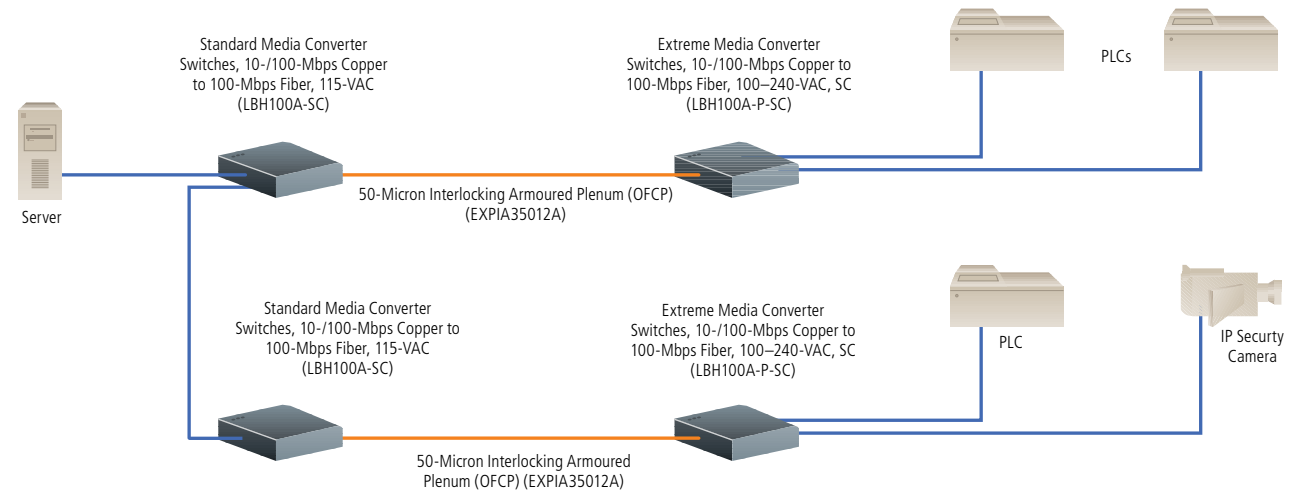

These Media Converter Switches can withstand even the toughest environments.

FEATURES

» Media Converter Switches feature LEDs on two sides so you can view network status at a glance no matter which way the unit is mounted.

» Function as both a media converter and a switch.

» Provide one 100-Mbps or 1000-Mbps Gigabit fiber port and two 10-/100-Mbps or 10-/100-/1000-Mbps UTP switch ports.

» Copper ports are autosensing for speed and duplex and feature MDI/MDI-X.

» Support VLAN tagging and Spanning Tree passthrough.

» Tough enough to withstand any environment—whether it's the wiring closet, the factory floor, or even the desert!

» Mount on DIN rails with optional brackets or you can rackmount up to 16 units in the optional trays.

» FF WARRANTY — 3 Years

Switch PLCs and an IP security camera on the shop floor to a 100-/1000-Mbps server over fiber plenum cable.

Standard Media Converter Switches, 10-/100-Mbps Copper to 100-Mbps Fiber, 115-VAC (LBH100A-SC)

Extreme Media Converter Switches, 10-/100-Mbps Copper to 100-Mbps Fiber, 100–240-VAC, SC (LBH100A-P-SC)

OVERVIEW

Use Standard Media Converter Switches in clean, temperature-controlled areas of +32 to +104° F (0 to +40° C), such as offices and closets.

Hardened Media Converter Switches suit -13 to +140° F (-25 to +60° C) operation in dusty or dirty environments. Their sealed cases are a heat sink, so no internal airflow is needed for cooling, and they resist contaminants such as dust, dirt, and moisture.

For harsher environments of -40 to +167° F (-40 to +75° C), choose Extreme Media Converter Switches. These rugged units are for outdoor use (they only require protection from water) and feature a sealed case, which uses its own metal shell as a heat sink.

Power supplies with recessed IEC connectors work with any IEC standard power cord, making them adaptable to most international locations.

DC-powered Hardened and Extreme units have internal screw termnals for connecting DC power in addition to the AC power jack. You can use them simultaneously with both your DC power supply and an AC power adapter (sold separately) to provide redundant power input.

You can also order a Powered Rackmount Tray, available with one or two common AC adapters that output 9 VDC to 16 Media Converter Switches.
