

IT50R**111-85019**

These cable ties are suitable for the identification and securing of cable bundles, saving valuable installation time by using just one product to both secure and identify. They can be marked either on-site or after bundling has taken place. They can be marked manually using the T82S series of indelible marker pens. In addition there is a large selection of labels available for marking.

One of the major benefits is the ability to both secure and identify cable bundles at different times.

One operation with two benefits.
