With the larger widths it is possible to use 2 U-feet. From 8 terminals upwards, the terminals on the upper tier are fitted with soldering lugs.

Variety of installation housings suitable for universal applications for the enclosure of PCBs fitted with complete sets of components.

Electronic modules are protected and housed in a very narrow space. They can be fitted using the connection system that you request.

The combination of a field-tested Wieland connection system and a high quality compact housing guarantees the safety required in all fields of application. Even under extreme conditions, the equipment has a long service life, technical perfection, reliability and involves low costs.

The empty housings come pre-assembled with connection terminals supplied U-foot, and without PCB.

(See parts catalogue 5, for designs fitted with components)
