Contact specification

F 58 - Electrical life (AC) v contact current  
2 & 3 pole relays

F 58 - Electrical life (AC) v contact current  
4 pole relay

H 58 - Maximum DC1 breaking capacity

- When switching a resistive load (DC1) having voltage and current values under the curve, an electrical life of  $\geq 100 \cdot 10^3$  can be expected.
- In the case of DC13 loads, the connection of a diode in parallel with the load will permit a similar electrical life as for a DC1 load. Note: the release time for the load will be increased.
