

STEVAL-ISA058V1

5 W single output SMPS demonstration board
based on the VIPer17 off-line high voltage converter

Features

- Input voltage range: 90 V_{AC} to 265 V_{AC_RMS}
- Output voltage: 5 V
- Maximum output current: 1 A
- RoHS compliant

Description

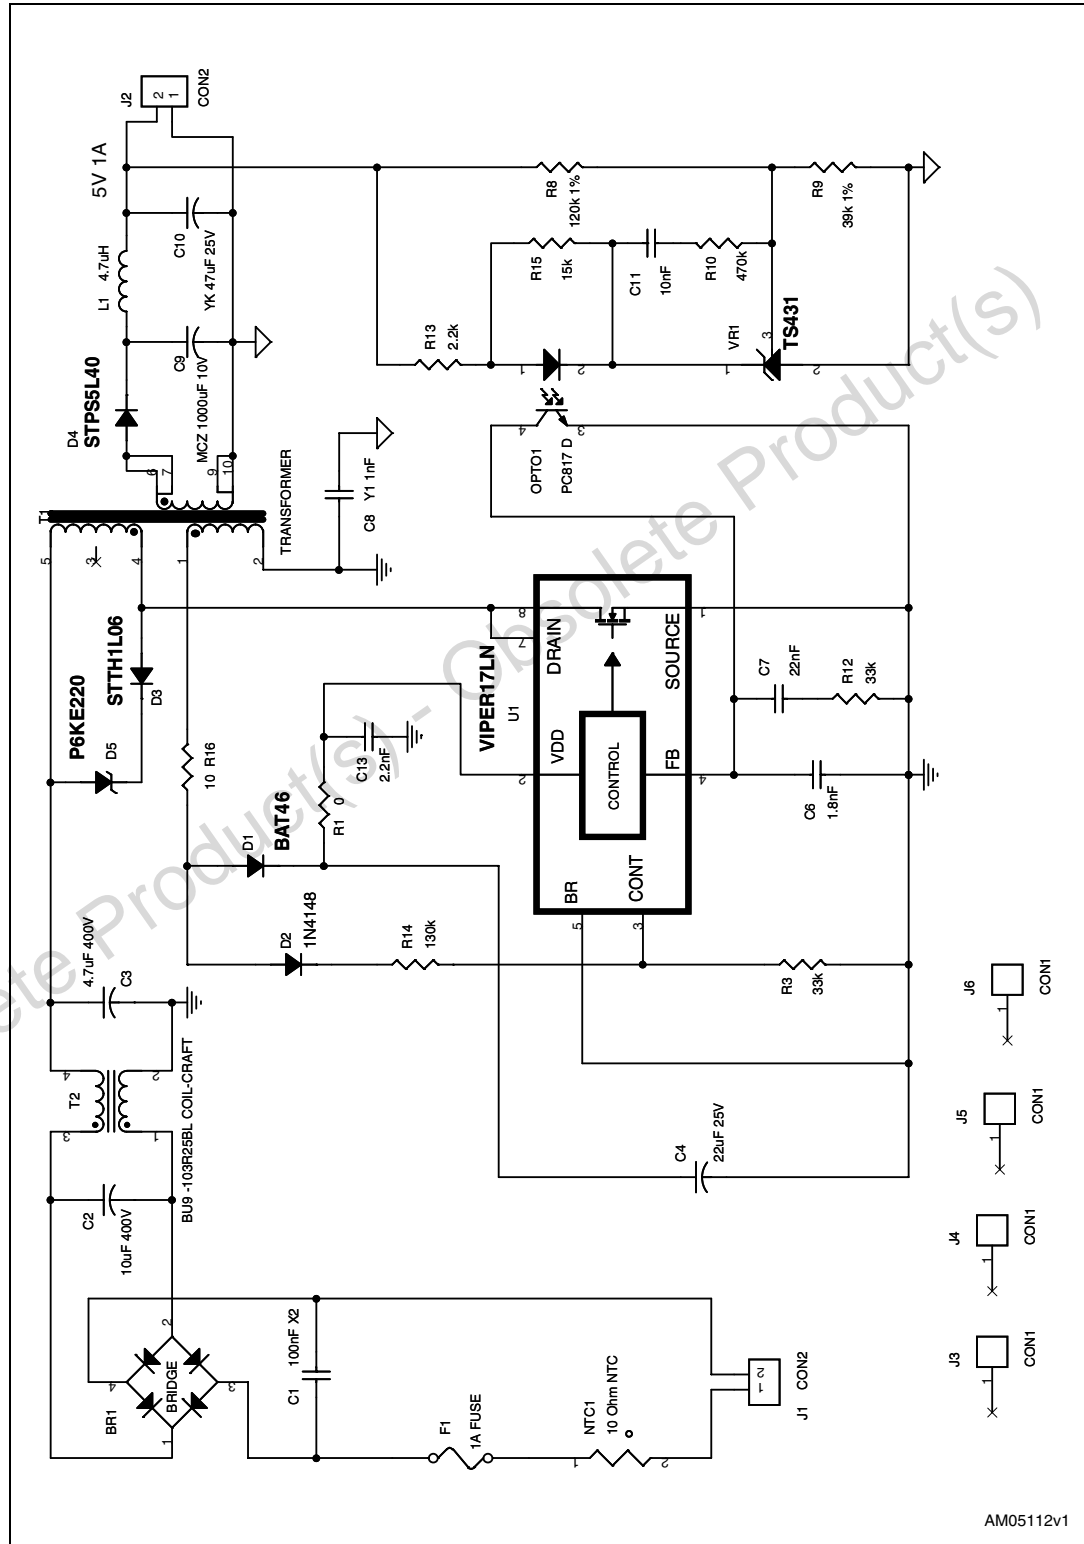

The STEVAL-ISA058V1 demonstration board is a 5 W off-line power supply designed as an evaluation platform for the VIPer17 offline high voltage converter.

The VIPer17 features an 800 V rugged power section, PWM control, two levels of overcurrent protection, overvoltage and overload protection, hysteretic thermal protection, soft-start and safe auto-restart after fault condition removal. Burst mode operation and the very low consumption of the device help to meet standby energy saving regulations. Advance frequency jittering reduces EMI filter cost. A brown-out function protects the switch mode power supply when the rectified input voltage level is below the normal minimum level specified for the system. A high voltage startup circuit is embedded in the device.
