WRISTBANDS

We manufacture a wide range of wristbands because requirements vary. All bands must be durable and make good skin contact but be comfortable even when worn for many hours. All our bands are available with stud connectors in one of three diameters: 4, 7, and 10mm. The wristbands use an elasticated fabric cuff. They are conductive on the inside, insulated on the outside and make full circumferential contact with the wrist.

ANTI - ALLERGENIC ELASTICATED WRISTBAND

J3141Y

- Very popular, expandable fabric cuff
- Three fixed sizes: 175, 160 or 145mm circumference
