## Multi-contact, Labor-saving, <br> Environment-friendly, Next-generation Safety-door Switch

- Lineup includes three contact models with 2NC/1NO and 3NC contact forms and MBB models in addition to the previous contact forms $1 \mathrm{NC} / 1 \mathrm{NO}$, and 2NC.
- M12-connector models are available, saving on labor and simplifying replacement.
- Standardized gold-clad contacts provide high contact reliability.
Applicable to both standard loads and microloads.

- Variety of metallic heads available.

Be sure to read the "Safety Precautions" on page 10 and the "Precautions for All Safety Door Switches".

## Model Number Structure

## Model Number Legend

## Switch (Standard type)

## D4NS $-\frac{\square}{1} \frac{\square}{3}$

1. Conduit/Connector size

1:Pg13.5 (1-conduit)
2:G1/2 (1-conduit)
4:M20 (1-conduit)
6:G1/2 (2-conduit)
8:M20 (2-conduit)
9:M12 connector (1-conduit)
2. Built-in Switch

A:1NC/1NO (slow-action)
B:2NC (slow-action)
C:2NC/1NO (slow-action)
D:3NC (slow-action)
E:1NC/1NO (MBB contact)
F:2NC/1NO (MBB contact)
3. Head Mounting Direction

F:Four mounting directions possible (Front-side mounting at shipping)/plastic
D:Four mounting directions possible (Front-side mounting at shipping)/metal
Note: An order for the head part or the switch part alone cannot be accepted. (The Operation Key is sold separately.)

## Switch (High pull-force type)

| :---: | :---: | :---: |
| Durability *2 | Mechanical | <Standard type> 1,000,000 operations min. <High pull-force type> 100,000 operations min. |
|  | Electrical | <Standard type> <br> 500,000 operations min. (3 A resistive load at 250 VAC) $* 3$ 300,000 operations min. (10 A resistive load at 250 VAC) <br> <High pull-force type> <br> 100,000 operations min. (10 A resistive load at 250 VAC) |
| Operating speed |  | 0.05 to $0.5 \mathrm{~m} / \mathrm{s}$ |
| Direct opening force *4 |  | <Standard type> 60 N min. <br> <High pull-force type> 80 N min. |
| Direct opening travel $* 4$ |  | 10 mm min. |
| Contact resistance |  | $25 \mathrm{~m} \Omega$ max. |
| Minimum applicable load *5 |  | 1 mA resistive load at 5 VDC ( N -level reference value) |
| Rated insulation voltage ( $\mathrm{U}_{\mathrm{i}}$ ) |  | 300 V |
| Rated frequency |  | $50 / 60 \mathrm{~Hz}$ |
| Protection against electric shock |  | Class II (double insulation) |
| Pollution degree (operating environment) |  | 3 (EN60947-5-1) |
| Impulse withstand voltage (EN60947-5-1) | Between terminals of same polarity | 2.5 kV |
|  | Between terminals of different polarity | 4 kV |
|  | Between each terminal and non-current carrying metallic parts | 6 kV |
| Insulation resistance |  | $100 \mathrm{M} \Omega \mathrm{min}$. |
| Contact gap |  | $2 \times 2 \mathrm{~mm}$ min. |
| Vibration resistance | Malfunction | 10 to $55 \mathrm{~Hz}, 0.75 \mathrm{~mm}$ single amplitude |
| Shock resistance | Destruction | $1,000 \mathrm{~m} / \mathrm{s}^{2} \mathrm{~min}$. |
|  | Malfunction | $300 \mathrm{~m} / \mathrm{s}^{2} \mathrm{~min}$. |
| Conditional short-circuit current |  | 100 A (EN60947-5-1) |
| Conventional free air thermal current (lth) |  | 10 A (EN60947-5-1) |
| Ambient operating temperature |  | -30 to $70^{\circ} \mathrm{C}$ (with no icing) |
| Ambient operating humidity |  | 95\% max. |
| Weight |  | Approx. 96 g (D4NS-1CF) |

Note: 1. The above values are initial values.
2. The Switch contacts can be used with either standard loads or microloads. Once the contacts have been used to switch a load, however, they cannot be used to switch smaller loads. The contact surfaces will become rough once they have been used and contact reliability for smaller loads may be reduced.
*1. The degree of protection is tested using the method specified by the standard (EN60947-5-1). Confirm that sealing properties are sufficient for the operating conditions and environment beforehand. Although the switch box is protected from dust or water penetration, do not use the D4NS in places where foreign material may enter through the key hole on the head, otherwise Switch damage or malfunctioning may occur.
*2. The durability is for an ambient temperature of 5 to $35^{\circ} \mathrm{C}$ and an ambient humidity of $40 \%$ to $70 \%$. For more details, consult your OMRON representative.
*3. Do not pass the 3 A, 250 VAC load through more than 2 circuits
*4. These figures are minimum requirements for safe operation.
$* 5$. This value will vary with the switching frequency, environment, and reliability level. Confirm that correct operation is possible with the actual load beforehand.

## Structure and Nomenclature

| $\begin{aligned} & \text { D4NS- } \square \mathrm{D} \square \\ & \text { D4NS- } \square \mathrm{DF} \text {-SJ } \end{aligned}$ | 3NC | cles: | $\begin{array}{r} 11-12 \\ 21-22 \\ 31-32 \\ \vdots \\ \text { Oper } \\ \text { Key } \\ \text { Komp } \\ \text { cositit } \\ \text { posit } \end{array}$ |  |  | NC contacts 11-12, 21-22, and 31-32 have a certified direct opening mechanism. <br> The terminals 11-12, 21-22, and 31-32 can be used as unlike poles. |
| D4NS- $\square$ E $\square$ | 1NC/1NO MBB * |  | $\begin{array}{r} 11-12 \\ 33-34 \\ \text { Ope } \\ \text { Oey } \\ \text { com } \\ \text { cosi } \end{array}$ |  |  | Only NC contacts 11-12 have a certified direct opening mechanism. <br> The terminals 11-12 and 33-34 can be used as unlike poles. |
| D4NS- $\square$ F $\square$ | 2NC/1NO MBB * |  | $\begin{array}{\|c} 11-12 \\ 21-22 \\ 33-34 \\ \text { 11-2 } \\ \text { Opera } \\ \text { Key in } \\ \text { conpl } \\ \text { positio } \end{array}$ |  |  | NC contacts 11-12 and 21-22 have a certified direct opening mechanism. <br> The terminals 11-12, 21-22 and 33-34 can be used as unlike poles |

* MBB (Make Before Break) contacts have an overlapping structure, so that before the normally closed contact (NC) opens, the normally open contact (NO) closes.

## Dimensions and Operating Characteristics

1-Conduit Models

| Operating characteristics Model | $\begin{aligned} & \text { D4NS-1 } \square \mathrm{F} \\ & \text { D4NS-2 } \square \mathrm{F} \\ & \text { D4NS-4 } \square \mathrm{F} \end{aligned}$ | $\begin{aligned} & \text { D4NS-2 } \square \mathrm{F}-\mathrm{SJ} \\ & \text { D4NS-4 } \square \mathrm{F}-\mathrm{SJ} \end{aligned}$ |
| :---: | :---: | :---: |
| Key insertion force Key extraction force | 15 N max. 30 N max. | 15N max. <br> (50N max.) |
| Pretravel (PT) | $6 \pm 3 \mathrm{~mm}$ | $6 \pm 3 \mathrm{~mm}$ |
| Total travel (TT) | (28 mm) | (28 mm) |
| Direct opening force $*$ Direct opening stroke $*$ | 60 N min. 10 mm min. | 80 N min. 10 mm min . |

* Always maintain the above operating characteristics for safe use.

## 2-Conduit Models

D4NS-6 $\square F$
D4NS-8 $\square F$

| Operating <br> characteristics | Model |
| :--- | :---: |
| Key insertion force <br> Key extraction force | D4NS-6 $\square \mathbf{F}$ <br> D4NS-8 $\square \mathbf{F}$ |
| Pretravel (PT) | $15 \mathrm{~N} \mathrm{max}$. <br> 30 N max. |
| Total travel (TT) | $6 \pm 3 \mathrm{~mm}$ |
| Direct opening force * <br> Direct opening stroke * | 60 N min. <br> 10 mm min. |
| * Always maintain the above operating characteristics |  |
| for safe use. |  |

## 1-Conduit Connector Models

## D4NS-9 $\square F$

| Operating <br> characteristics | Model |
| :--- | :---: |
| Key insertion force <br> Key extraction force | 15 N max. <br> $30 \mathrm{~N} \mathrm{max}$. |
| Pretravel (PT) | $6 \pm 3 \mathrm{~mm}$ |
| Total travel (TT) | $(28 \mathrm{~mm})$ |
| Direct opening force * <br> Direct opening stroke * | 60 N min. <br> 10 mm min. |
| * Always maintain the above operating characteristics |  |
| for safe use. |  |

for safe use.

Note: 1. Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.
2. There are fluctuations in the contact ON/OFF timing for Switches with multiple poles (2NC, 2NC/1NO, or 3NC). Confirm performance before application.

## Operation Keys

(

D4DS-K2

Note: Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.

With Operation Key Inserted (Relationship between Insertion Radius and Key Hole)

D4NS-1 $\square$ F + D4DS-K1
(with Front-inserted Operation Key)

D4NS-1 $\square$ F + D4DS-K1
(with Top-inserted Operation Key)

D4NS-1 $\square$ + D4DS-K2
(with Front-inserted Operation Key)

D4NS-1 $\square$ F + D4DS-K2
(with Top-inserted Operation Key)

Note: Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.

D4NS-1 $\square$ F + D4DS-K3 (with Front-inserted Operation Key)

D4NS-1 $\square$ F + D4DS-K3
(with Top-inserted Operation Key)

D4NS-1 $\square$ F + D4DS-K5
(with Top-inserted Operation Key)

Note: Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.

## Safety Precautions

Refer to the "Precautions for All Switches" and "Precautions for All Safety Door Switches".

## @CAUTION

Electric shock may occasionally occur. Do not use metal connectors or metal conduits.

## Precautions for Safe Use

- Do not use the Switch submersed in oil or water or in locations continuously subject to splashes of oil or water. Doing so may result in oil or water entering the Switch. (The IP67 degree of protection of the Switch specifies the amount of water penetration after the Switch is submerged in water for a certain period of time.)
- Always attach the cover after completing wiring and before using the Switch. Also, do not turn ON the Switch with the cover open. Doing so may result in electric shock.
- Do not switch circuits for two or more standard loads (250 VAC, 3 A). Doing so may adversely affect insulation performance.

## Stopper Installation

Do not use a Switch as a stopper. Be sure to install a stopper as shown in the following illustration to ensure that the base of the Operation Key does not strike the Head, and adjust the stopper to be within the setting zone ( 0.5 to 3 mm ) of the base of the Operation Key. Do not subject the Switch to a shock that exceeds the Switch's shock resistance of $1,000 \mathrm{~m} / \mathrm{s}^{2}$.

## Precautions for Correct Use

The Switch contacts can be used with either standard loads or microloads. Once the contacts have been used to switch a load, however, they cannot be used to switch smaller loads. The contact surfaces will become rough once they have been used and contact reliability for smaller loads may be reduced.

## Mounting Method

Appropriate Tightening Torque

- Loose screws may result in malfunction. Tighten the screws to the specified torques.

| Terminal screw | 0.6 to $0.8 \mathrm{~N} \cdot \mathrm{~m}$ |
| :--- | :--- |
| Cover mounting screw | 0.5 to $0.7 \mathrm{~N} \cdot \mathrm{~m}$ |
| Head mounting screw | 0.5 to $0.6 \mathrm{~N} \cdot \mathrm{~m}$ |
| Operation Key mounting screw | 2.4 to $2.8 \mathrm{~N} \cdot \mathrm{~m}$ |
| Body mounting screw | 0.5 to $0.7 \mathrm{~N} \cdot \mathrm{~m}$ |
| Connector | 1.8 to $2.2 \mathrm{~N} \cdot \mathrm{~m}$ |
| Cap screw | 1.3 to $1.7 \mathrm{~N} \cdot \mathrm{~m}$ |

- When loosening a screw with an electrical screwdriver or similar tool while pressing down on the screw head, do not continue turning the screw past the point where the threads disengage Doing so may strip the end of the threads.

## Mounting Holes

- Use M4 screws and spring washers to mount the Switch and Operation Key, and tighten the screws to a suitable torque. To ensure safety, use screws that cannot be easily removed or another means to prevent the Switch and Operation Key from easily being removed.
- As shown below, two studs with a maximum height of 4.8 mm and a diameter of $4_{-0.15}^{-0.05} \mathrm{~mm}$ can be provided, the studs inserted into the holes on the bottom of the Switch, and the Switch secured at four locations to increase the mounting strength.

Switch Mounting Holes and Studs Operation Key Mounting Holes

- 1-Conduit Modules

- 2-Conduit Modules

- Set the Operation Key so that it is within 1 mm of the center of the key hole. If the Operation Key is offset or at an angle, accelerated wear or breaking may result.
- Observe the specified insertion radius for the Operation Key and insert it in a direction perpendicular to the key hole.

## Head Direction

- The rotation of the Switch head may be adjusted to any of the four directions by loosening the head mounting screws at the four corners of the head. Make sure that no foreign materials enter through the head.
- Do not insert or remove the Operation Key with the Switch head removed. Doing so may make it impossible to insert the Operation Key.

## Securing the Door

When the door is closed (with the Operation Key inserted), the Operation Key may exceed the set zone because of, for example, the door's own weight, machine vibration, or the door cushion rubber. Secure the door with a stopper so that the Operation Key remains within the set zone.

Horizontal/Vertical Mounting (D4DS-K1/-K2)

- Horizontal Adjustable Mounting (D4DS-K3)

- Horizontal/Vertical Adjustable Mounting (D4DS-K5)

## Wiring

## Wiring

- When connecting with insulation tubes and M3.5 crimp terminals, connect the terminals as shown in the following figure and wire without overriding to the case and the cover. Adequate conductor size is AWG 20 to AWG18 ( 0.5 to $0.75 \mathrm{~mm}^{2}$ ).
Prepare lead wires using the lengths given in the following diagrams. If lead wires are too long, they will press against the cover causing the cover to not close properly.

1-Conduit Models with 3 Poles

2-Conduit Models with 3 Poles

- Do not push the crimp terminal and the likes into the opening between the parts to prevent the case from being broken and deformed.
- Use terminals having the thickness of 0.5 mm or less to avoid the contact between the terminal and the Switch case inside.

## <Reference>

The crimp terminals listed below have a thickness of 0.5 mm or less.

| Manufacture | Type |
| :---: | :--- |
| J.S.T. Mfg Co. | FN0.5-3.7 (F Type) |
|  | N0.5-3.7 (Straight Type) |

J.S.T is a Japanese manufacturer.

## Correct

Incorrect

## Pin arrangement of connector type

- Suitable socket is XS2F-D421 series (OMRON).
- Refer to the Connector Catalog for corresponding Socket pin numbers and lead wire colors.

## Socket Tightening (Models with Connectors)

- Turn the tightening screws on the Socket by hand and tighten them until the gap between the Socket and Plug essentially disappears.
- Make sure that the Socket's connector is tightened securely, otherwise the rated degree of protection (IP67) of the D4NS may not be maintained, or the Socket connector may be loosened by vibration.

## Conduit Opening

- Use cables with suitable diameters for the connector being used.
- When wiring, place the enclosed cap screw on unused conduit openings (for 2-Conduit Switches) and tighten them to the suitable tightening torque.

## Recommended Connectors

Use the connector with thread section of 9 mm long or less. If a connector with a longer thread section is used, the protruding part may interfere with the other parts inside the body. Use the connectors listed below to ensure IP67 degree of protection.

| Size | Manufacture | Model | Applicable cable <br> diameter |
| :--- | :--- | :--- | :--- |
| G1/2 | LAPP | ST-PF1/2 <br> $5380-1002$ | 6.0 to 12.0 mm |
| Pg13.5 | LAPP | S-13.5 <br> $5301-5030$ | 6.0 to 12.0 mm |
| M20 | LAPP | ST-M20 $\times 1.5$ <br> $5311-1020$ | 7.0 to 13.0 mm |

When use LAPP's products, use together with a Seal Packing which is sold separately (Type names, JPK-16, GP-13.5, or GPM20) and tighten with proper tightening torque.

- LAPP is a German manufacturer.
