2. Performance characteristic data are measured at a coil temperatures of $23^{\circ} \mathrm{C}$.
3. AC coil resistance and impedance are provided as reference values (at 60 Hz ).
4. Power consumption drop was measured for the above data. When driving transistors, check leakage current and connect a bleeder resistor if required.

Note: 1. The above model is the LY2-0.
2. This figure is 6.4 for the LY1-0

Note: 1. The tolerance for the above figures is 0.1 mm .
2. Besides the terminals, some part of the LY1-0 carries current. Due attention should be paid when mounting the LY1-0 to a double-sided PC board.

## Upper-mounting Relays

## Mounting Holes

Note: 1. Eight 3-dia. holes should apply to the LY2F model.

## Mounting Height with Socket

The following Socket heights should be maintained.

Front-connecting

PTF $\square \mathrm{A}(-\mathrm{E})$

Back-connecting

PT $\square$

Note: 1. The PTF $\square$ A (-E) can be track-mounted or screw-mounted.
2. For the LY $\square$-CR (CR circuit built-in type) model, this figure should be 88.
