## Description

The HCPL4503M, 6N135M, 6N136M, HCPL2530M and HCPL2531M optocouplers consist of an AIGaAs LED optically coupled to a high speed photodetector transistor.

A separate connection for the bias of the photodiode improves the speed by several orders of magnitude over conventional phototransistor optocouplers by reducing the base-collector capacitance of the input transistor.
The HCPL4503M has no internal connection to the phototransistor base for improved noise immunity.

An internal noise shield provides superior common mode rejection of up to $50,000 \mathrm{~V} / \mu \mathrm{s}$.

Absolute Maximum Ratings ( $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$ unless otherwise specified)
Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

6. The $4.1 \mathrm{k} \Omega$ load represents 1 LSTTL unit load of 0.36 mA and $6.1 \mathrm{k} \Omega$ pull-up resistor.
7. The $1.9 \mathrm{k} \Omega$ load represents 1 TTL unit load of 1.6 mA and $5.6 \mathrm{k} \Omega$ pull-up resistor.
8. Common mode transient immunity in logic high level is the maximum tolerable (positive) $d V_{c m} / d t$ on the leading edge of the common mode pulse signal $\mathrm{V}_{\mathrm{CM}}$, to assure that the output will remain in a logic high state (i.e., $\mathrm{V}_{\mathrm{O}}>2.0 \mathrm{~V}$ ). ## ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, www.fairchildsemi.com, under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.
