Acronyms in This Document

A list of acronyms used in this document.

Acronym	Definition
CPI	CEC Programming Interface
DVI	Digital Visual Interface
GPIO	General Purpose Input/Output
HDCP	High-Definition Content Protection
HDMI	High Definition Multimedia Interface
I ² C	Inter-Integrated Circuit
LDO	Low Dropout
TMDS	Transition-Minimized Differential Signaling
TPI	Transmitter Programming Interface
VIP	Video Interface Platform

1. Introduction

This document describes the Lattice Semiconductor HDMI[®] VIP Output Bridge Board. This board is designed to work with the Lattice Video Interface Platform board interconnect system. The board's key component is the Lattice Semiconductor Si1136 HDMI Deep Color Transmitter.

The content of this user guide includes descriptions of board components, schematics, and bill of materials.

Key features of the HDMI VIP output bridge board include:

- Si1136 HDMI deep color transmitter
 - Video Input: Supports video resolutions up to 8-bit 4K (30 Hz), 12-bit 1080p (60 Hz), 12-bit 720p/1080i (120 Hz), and 16-bit 1080p (30 Hz)
 - HDMI Output: DVI and HDMI transmitter with xvYCC extended color gamut, deep color up to 16-bit color, 3D, and high bitrate audio support
 - Up to 300 MHz TMDS Output Clock
 - No HDCP support
- Single-Link 19-pin HDMI Type-A connector
- Two 60-pin rugged high-speed headers

Figure 1.1 shows the top view of the HDMI VIP output bridge board and its key components. Figure 1.2 on the next page shows the bottom view of the board.

Figure 1.1. Top View of HDMI VIP Output Bridge Board

1.1. Further Information

For more information on boards and kits available for the VIP system, visit www.latticesemi.com/boards

For details about the Si1136 device refer to Si1-DS-1084, [Si19136-3/Si1136 HDMI Deep Color Transmitter Data Sheet](#).

Refer to [Appendix A](#) and [Appendix B](#) for the schematics and BOM of the HDMI VIP Output Bridge board.

Figure 1.2. Bottom View of HDMI VIP Output Bridge Board

2. Functional Description

The SiI1136 receives RGB or YCbCr parallel video data and I²S audio from connectors J1 and J2. Based on the configuration, the SiI1136 converts the incoming data to HDMI or DVI and outputs to the HDMI Type-A connector.

Figure 2.1. Functional Block Diagram

The SiI1136 transmitter is configured using the I²C interface from connector J1. The I²C registers monitor and control all functions of the SiI1136 transmitter. The device address select pin CI2CA on the SiI1136 is pulled high, see Table 2.1 for the corresponding I²C addresses. For configuration, refer to the SiI9136-3 and SiI9334 HDMI Transmitter Programmer’s Reference for complete information. *The Programmer’s Reference requires an NDA with Lattice Semiconductor.*

Table 2.1. SiI1136 7-bit I²C Address

Block	CI2CA = 1
Configuration Registers	0x3F
TPI	0x3B
CPI	0x62

2.1. Reset

The push button switch SW1 controls the reset signal HDMI_RESET. Pressing the push-button sends logic 0 to the SiI1136 RESET# pin. The HDMI_RESET pin can be connected to the GSRN pin on connector J1 by closing jumper J4, allowing SW1 to control the reset signal for other connected boards.

2.2. HDMI Interface

The HDMI Type A connector connects the HDMI VIP output board to an HDMI Sink (that is a monitor). ESD protection is provided on the TMDS signals.

3. High-Speed Headers and Jumper

Two 60-pin high speed headers, connectors J1 and J2, are used to connect to a host board.

Jumper J4 – When jumper J4 is closed, it connects the HDMI_RESET pin to the GRSN pin on connector J1.

Table 3.1. Connector J1

J1 Connector Pin	Signal Name	Sil1136 Pin
1	GND	—
2	12V	—
4	12V	—

4. Power Supply

Board power is supplied through connectors J1 and J2.

Figure 4.1 shows the power distribution scheme.

Figure 4.1. Power Supply

5. Status Indicators and Test Points

Two discrete LEDs on the board show the application status. These are driven by connector J2. [Table 5.1](#) lists the status LED I/O map.

Table 5.1. Status LED I/O Map

Signal	LED Number	J2-Pin	Color
LED1	D23	23	Green
LED2	D22	38	Green

Table 5.2. Test Points

Test Point	Connection
TP1	5 V supply to HDMI Connector
TP3	CEC A from HDMI Connector
TP5	Si1136 Pin 40/CEC_A
TP6	Si1136 Pin 49/GPIO3
TP7	Si1136 Pin 39/GPIO2

TP16	J1 Pin 53
TP17	J1 Pin 29
TP18	J1 Pin 25

6. Ordering Information

This board is included as part of a kit, and not available as a separate item. The below part number is for reference only, so it is clear which board is described in this document. Please visit www.latticesemi.com/boards for the latest ordering information.

Table 6.1. Reference Part Number

Description	Ordering Part Number
HDMI VIP Output Bridge Board	HDMI-VIP-OB-EVN
